

Cancel an appointment

Last Modified on 08/05/2024 1:48 pm AEST

Cancel a patient's appointment, create custom reasons for canceling an appointment and use Zedmed reporting to monitor who is canceling appointments and why.

Cancel an appointment

Appointments should be canceled and not deleted and a reason should be selected from the cancellation drop-down list, as this information can be captured by reports. Once canceled, the appointment is removed from the Appointment Book.

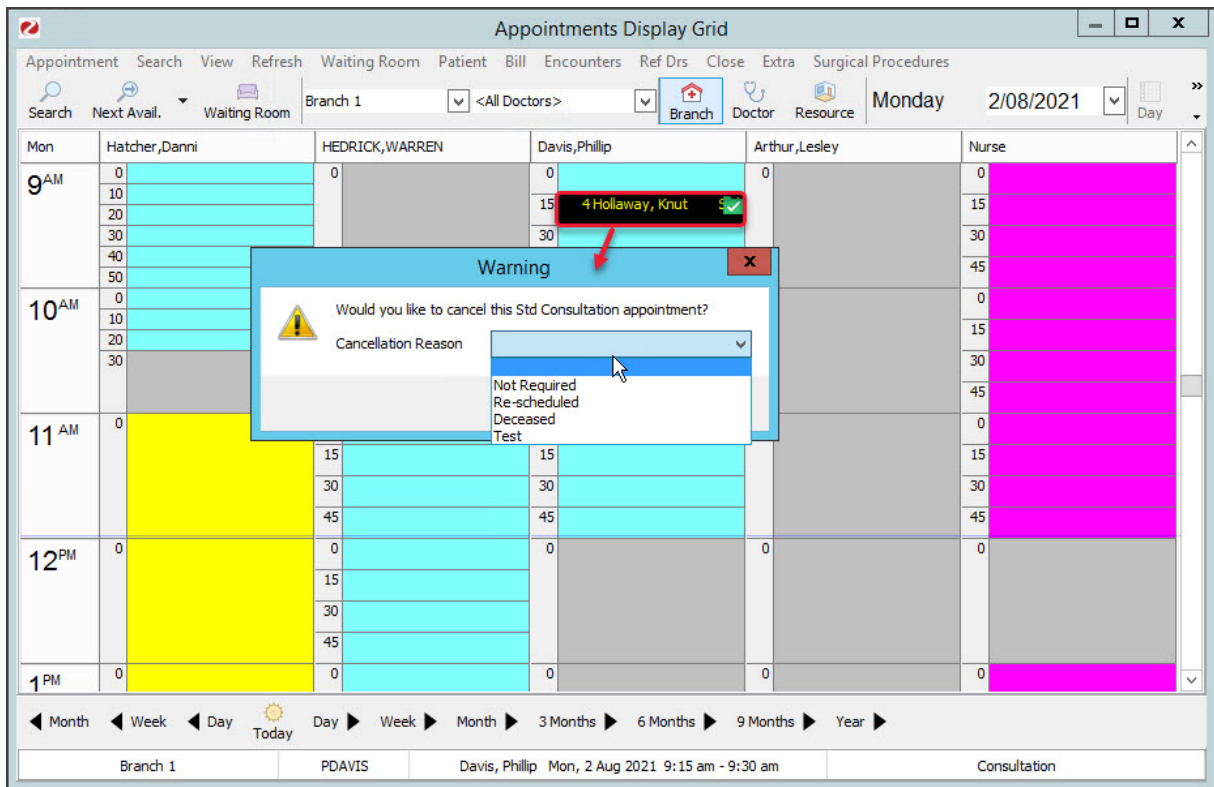

Use these reports to monitor cancellations:

- **Appointment Audit report:** From the Appointment Book, select Extra on the top menu, then Audit to open **the report**.
- **Appointments report:** Reception tab, select Daily reports > Appointments. Select Dates > Cancelled/Missed > Screen.
- **History search:** Appointment Book Search field > look up a patient to see their appointment history and cancellations.

To cancel an appointment:

1. Go to Zedmed's **Reception** tab.
2. Select **Appointments**.
The **Appointments Display Grid** screen will open. If the screen was already open, select **Refresh**.
3. Right-click the appointment and select **Cancel**.
A **Warning dialog** will open.
4. Select the reason for the cancellation.
5. Select **Cancel**.

If you use the **Cancellation Waiting list**, you can move a waitlisted patient to the time slot.

Add new cancellation reasons

To create custom options:

1. Go to Zedmed's **Management** tab.
 2. Select **Practice Setup** then **Drop-Down List Management**.
- The **Drop-Down List Management** screen will open.
3. Select the **Appointment Cancellation Reasons** category.
 4. Select **Add Value** and enter a name for the reason.
 5. Select the tick box below each branch where the item should be available.

Each branch set up for the practice will appear along the top.

6. Select **Close** to save and exit.
