

Set Site Type (Specialist/GP)

Last Modified on 10/02/2025 3:04 pm AEDT

The options available in Zedmed can change based on whether a practice is set up as specialist practice or general practice. For example, a specialist practice will have the Referrer displayed in the Clinical Records patent demographics section, and the referral letter will be called the Specialist Letter.

To set up the site:

- 1. Go to Zedmed's Reception tab.
- 2. Select Clinical Records.

The **Clinical Records** screen will open.

3. Select **Tools** > **Global Options** from the top menu.

The General tab will open by default.

4. Use the Site Type field to select Specialist or General Practice.
