Set up Online Appointments

Version: 2.02 | Last Modified on 04/02/2026 1:51 pm AEDT

Zedmed's Online Appointments (OLA) allows patients to book their own appointments from a practice's website. The OLA interface will include your practice logo and allows patients to choose from the doctors, Appointment Types and locations that are made available. This guide explains how to add this information and enable Online Appointments.

Quick setup video

When setting up OLA for the first time, we recommend following the quick setup video, which covers the minimum steps required.

We also have the steps in this video as a **quickstart guide**.

Step 1 - Branch setup

Requirements

- Zedmed v35.7 or later. Zedmed v38 or later for document/referral uploads
- An HPI-I number or a Practitioner ID for each participating practitioner.
- Biographic information is also needed for each practitioner, and photos are recommended.

OLA is configured separately for each branch. Ensure that the steps in this section are performed for each branch.

To set up each branch:

1. Select **Practice Setup > Branches.**

   The **Practice Details** screen will open with the **Branches** tab selected.
2. In the **Name** field, select the branch you are configuring OLA for.
3. Review the following settings:

   a) Available Online

   The branch is made available for OLA when this box is ticked. Until then, the branch will show 'Not Available' in OLA.

   <u>**Do not tick this box until you are ready to go live with OLA**</u>. Complete the other steps in this guide first.

   b) Can Cancel Online Appointments

   If you tick this box, patients can cancel their appointments up to the appointment's start time. Ticking the box applies the cancellation buffer in hours, as configured in the Online appointment Details (shown below).

4. Select the **Online Appointment Details** button.
5. **Referral Upload Email** (Zedmed v38 and later)

   Enter an email address to receive documents provided by patients making appointments. To learn more, see Document Requests.

   This email address should be monitored and Referrals added to the patient's record.
6. **Cancellation buffer**

   The optional setting allows you to set a time buffer (in hours) within which the patient cannot cancel or change an Online Appointment. If they try, a message will advise that the appointment cannot be altered. Set the number of hours for the **Cancellation buffer (hours)** in Office, for example, '**2**'. Requires Zedmed v38.8 or later.
7. **Doctors Name Display** (Zedmed v28 and later)

   This optional setting allows you to determine how doctors are ordered in OLA. If this feature is used, it overrides the default order, which is determined by the order of doctors in the Appointment book.

   - Use the arrows to move doctors in the **Doctor display sequence**.

   - Use the Up/Down arrows to set the order you want doctors to appear in OLA.

These changes take up to 30 minutes to update on the practice website.

8. Fill in the **Contact numbers**, **Fee Information** and **Opening hours.**

These changes will take 1 hour to update on the practice website.

The screenshot below shows how this information is displayed in OLA.
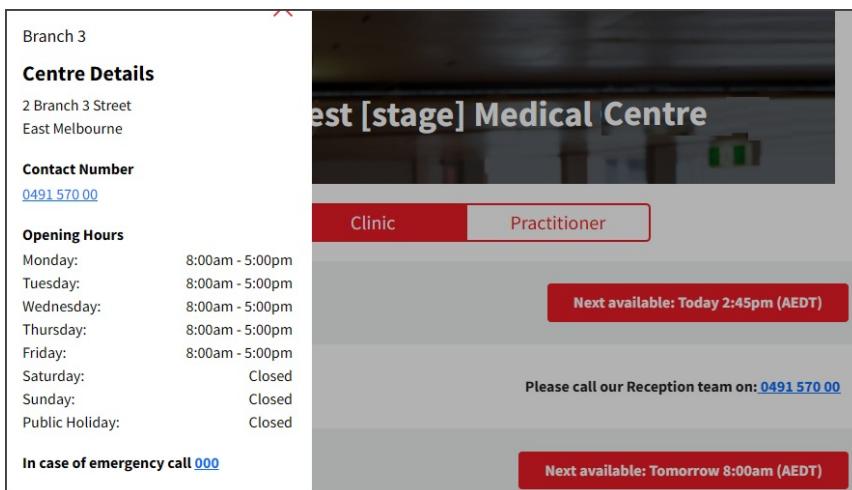

Step 2- Doctor's setup

The Doctor Details screen is where you enable each doctor for Online Appointments and add information about them. **Medical Interests** and **Language** will become selectable options for the patient to filter the doctors shown in Online Appointments.

To set up a doctor for Online Appointments:

1. Go to Zedmed's **Management** tab.
2. Select **Practice Setup > Doctors > Find Treating Doctors.**

   The **Find Doctor Details** screen will open.
3. Find and open the doctor.
4. Select the **Available Online** tickbox to make the doctor's schedule available in OLA.

For the most up-to-date documentation version, visit https://help.zedmed.com.au/help

5. The following information must be in the Doctor's Details, or their appointments will not appear:

    ○ A valid title.
    ○ A valid name.
    ○ A valid Doctor Code.
    ○ A valid HPI-I number or a Practitioner ID if the practitioner does not have an HPI-I.
    ○ Information must be entered in the **Qualification** and **Biographic Information** sections.

6. Fill in the **Qualification** section with the information you want to appear in OLA. Use a comma between each item.

7. Use the **Booking time buffer** field to enter a value in minutes.

    This will restrict the available appointments sent to the Online Appointments (OLA) by only allowing appointment slots that begin after (Booking Time + Buffer) and preventing bookings close to the current time. Requires Zedmed v37 and later.

8. Select **Biographic Information**

    Biographic Details screen.

    Medical Interests & Languages Spoken

    Enter this information and separate items with commas, because they are used as filters.

    The doctor's profile picture

    Use the Load Image button to add a photo of the doctor, with the following considerations:

    - The photo's height and width must be no larger than 800px.

    - The photos must be 24-bit (32-bit is not supported).

   - Use a square photo cropped to the face without the shoulders for the best results.

    Meeting these requirements may require editing software or a free site like https://www.resizepixel.com/

9. Select **Close** to save your changes.
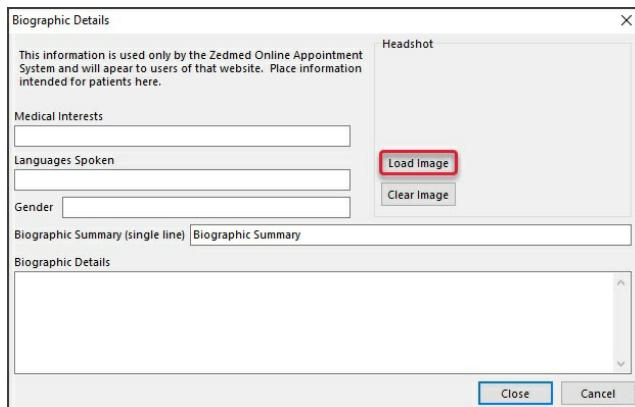

We recommend monitoring the terms used or providing guidelines to avoid variations of the same interest/language.

These changes will take 1 hour to update on the practice website.
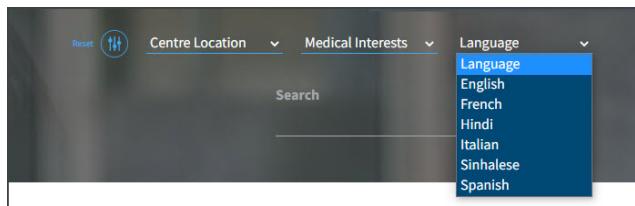

Step 3 - Appointment Types setup

Each Appointment Type must be enabled for OLA, and each doctor must be made available for each Appointment Type.

To enable up Appointment Types for OLA:

1. Go to Zedmed's **Management** tab.
2. Select **Practice Setup** then **Appointments** > **Appointment Types**.

   The **Appointment Types** screen will open.
3. In the left-hand pane, select an Appointment Type to be made available for OLA.

   The Appointment Type will appear in the **Type Name** field.
4. Select **Available Online**.
5. Respond to the prompt asking if you want to make all doctors available:

   - Selecting **Mark as Unavailable** will leave doctors in the **Available Online** column unticked.

     You can then manually choose the doctors accepting Online Appointments.
   - Selecting **Mark as Available** will select all doctors in the **Available Online** column.
6. Under **Available to**, select who can book an Appointment: New or Existing patients or both.
7. Select **Referral Letter Required** if you want to prompt patients to upload a document with this Appointment Type.
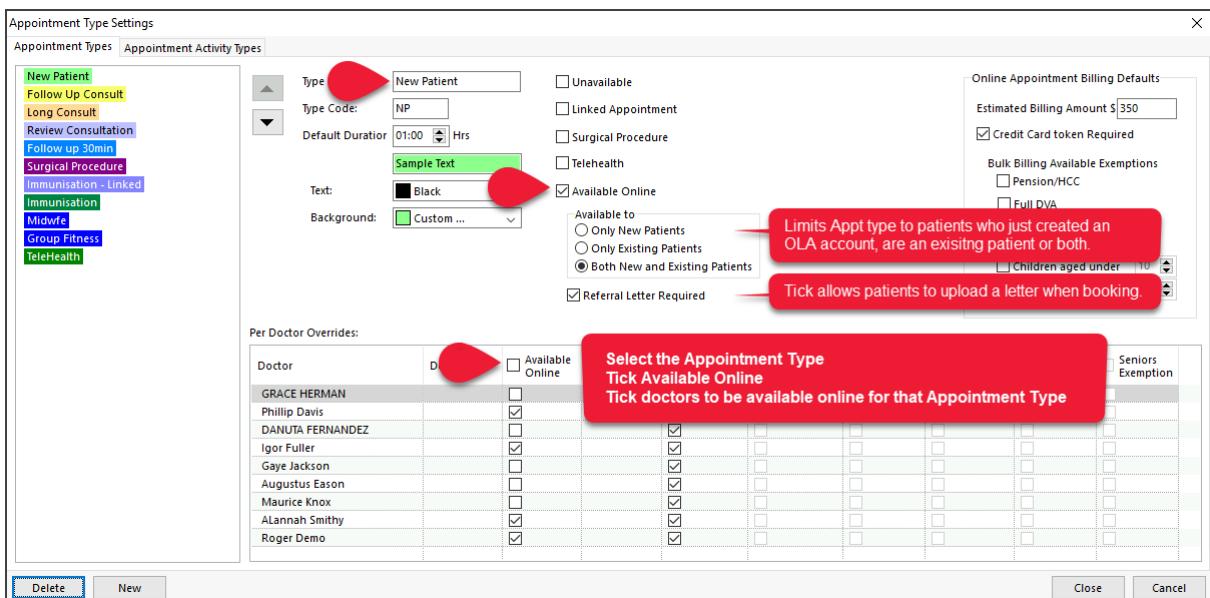

> **Important** - Appointment Types in OLA are selected using a drop-down that lists them in the order they appear here. The top Appointment Type is the default, and you can change the appointments' order using the up and down arrows.

8. If this is a new Appointment Type:

   Remember to select the **Appointment Activity Types** tab, and tick the new appointment for the applicable Activity Type.
9. Repeat the steps for each **Appointment Type**.
10. Select **Close** to save and exit.

Step 4 - Schedules setup

The sessions in each doctor's schedule must be enabled for OLA, even if the doctor has been selected in Appointment Types.

To set up a doctor's schedule for Online Appointments:

1. Go to Zedmed's **Management** tab.
2. Select **Practice Setup** then **Appointments** > **Schedules**.

   The **Set Schedules for Doctor or Resource** screen will open.
3. In the **Doctor** field, select the doctor who is using Online Appointments.
4. In the **Schedules** section, select the schedule entry.
5. In the **Sessions** section, select the day.
6. Select the **Available Online** tick box.
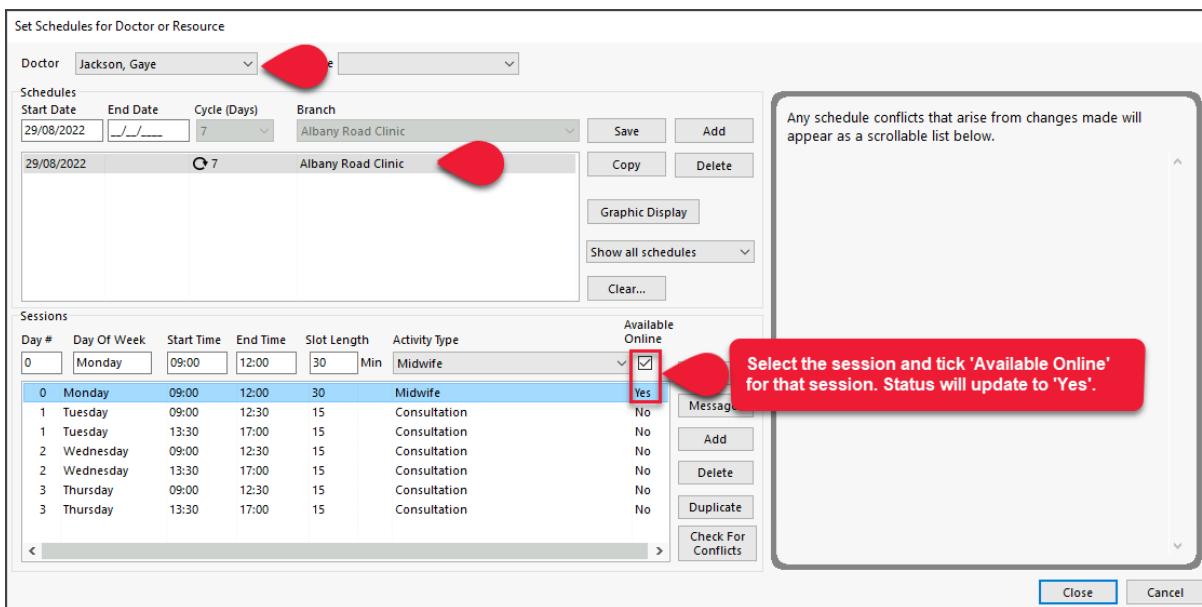

7. **Messages**.

   This option adds a message to a session, which will be displayed when a patient selects an appointment time during that session.

   To enable a message, tick the box next to it. To learn more, see Using Messages.
8. **Important**: check that all active schedules have been reviewed and the session made available as required.
9. Repeat all of these steps for each doctor.
10. Select **Close** to save and exit.

Using Messages

Create a set of messages and have a selected message display when a patient selects an appointment.

- The practice should create a standard set of messages.
- All messages are saved and can be used by other doctors.
- Messages are added at the session level per doctor.
- If you select multiple messages, they will be appended to the same message dialog.
- There is no character limit, but too much text can push the message beyond a phone's screen size.
- Selectable hyperlinks are no supported.

Managing Messages

1. Follow the steps in Schedule setup to open a doctor's schedule.
2. Select the **Messages** button (it doesn't matter what doctor or schedule).
3. Use the **Add** button to add a new message.
4. Use the **Edit** button to update an existing message.

Patent Responses

The message will display when a patient selects an appointment during that session.
Patients must confirm they understand or accept the message
Selecting **No, Cancel** takes the patient to the previous step. Selecting **Yes, Continue** will create the appointment
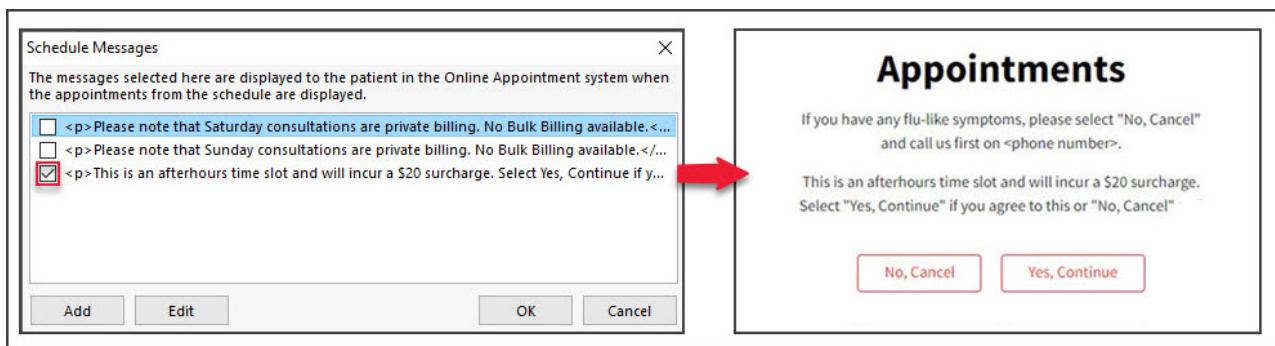

Testing the setup

Once the setup has been completed, it should be tested when Online Appointments is live on your website to ensure it functions as intended. This will also help you understand a patient's booking process.

To learn more about using OLA, see our guide for patients.

The recommended checks are:

1. Select each branch to check their details display (contact number, hours, information).
2. Select each doctor's details to make sure they are displayed.
3. Make a test booking. To proceed further, you will need to provide some test patient information.
4. Check the booking appears in your Zedmed Appointment book.
5. Reconcile the booking to the patient in Zedmed using the Processing Online Appointments guide.

   You only reconcile a patient's booking to their record in Zedmed the first time they make an Online Appointment.

Blocking specific patients

Practices can block existing patients from booking appointments using OLA.

To enable this feature, open the patient's record and tick the box next to **Block patient from online bookings.**

Requires Zedmed v38.7 or later. Applies to existing patients with OLA accounts that were reconciled to their patient records.

This is what the patient will see in OLA,

Confirm My Booking

There was a problem booking your appointment, please contact the centre

Patient Selection

Please select the patient attending this appointment from the list below, or select "Lookup Patient" and fill in their details.
