

Manually receipt a Medicare payment for a voided invoice

Last Modified on 11/10/2024 11:18 am AEDT

If you have voided an invoice and not informed Medicare that day, you will receive a payment for that claim and will not be able to reconcile the payment because the invoice is no longer valid. The invoice will show an amount paid and \$0:00 outstanding.

Quickstart guide

This will result in 2 possible scenarios for reconciling:

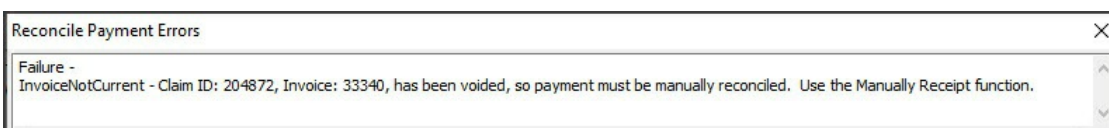

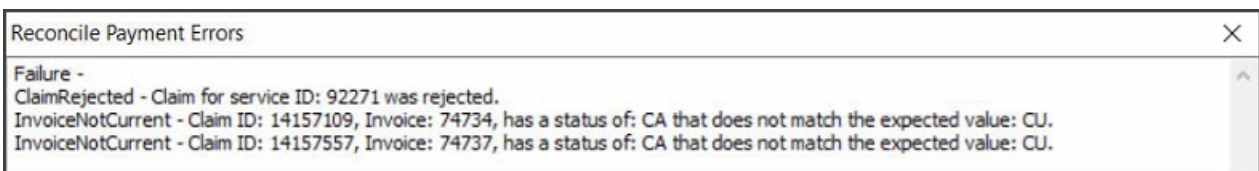

- The payment from Medicare is valid so you need to create an invoice to **manually receipt** the payment for the voided invoice.
- The payment from Medicare is not valid so you need to **refund the payment** for the voided invoice.

Caution: Don't use these processes if you upgraded to Zedmed v35 and have unreconciled claims from before the upgrade. Instead, note the payment information and perform the manual receipting from the patient Account Enquiry screen.

Note: In Zedmed v37.4.0 to avoid changes to an invoice after transmitting a claim, adjustments cannot be made to that invoice from Account Enquiry for 1 day. The Practice can increase this duration or change it to 0 to disable it in Practice details.

Identifying a payment for a voided invoice

If you try to reconcile a Medicare payment with a claim for a voided invoice, the reconciliation will fail and you will receive one of these error messages depending on your version of Zedmed you have. The voided invoice will need to be manually receipted. If the bulk bill payment had multiple invoices, you will need to manually receipt all of the invoices. You may also need to refund Medicare if payment was made for an incorrect claim.

Manually receipt an invalid Medicare payment for a voided invoice

This process is for receipting payment advice that includes a payment for an invoice that was voided. In this scenario, you will need to manually receipt the valid invoices in the payment, then contact Medicare who will advise on the refund process for the duplicate payment. This will leave an unallocated credit that you can then allocate as a refund.

Step 1 - Receipt the valid (correct) invoices

To receipt the valid invoices in the Payment ID:

1. Go to Zedmed's **Management** tab.
2. Select **Claims**.
3. Select the **Payment** tab.
4. Expand the applicable **Payment ID**.

At this point, you may want to use the Print Report feature at the bottom of the screen to capture all the invoices under the Payment ID, as you will need to manually allocate them in a later step.

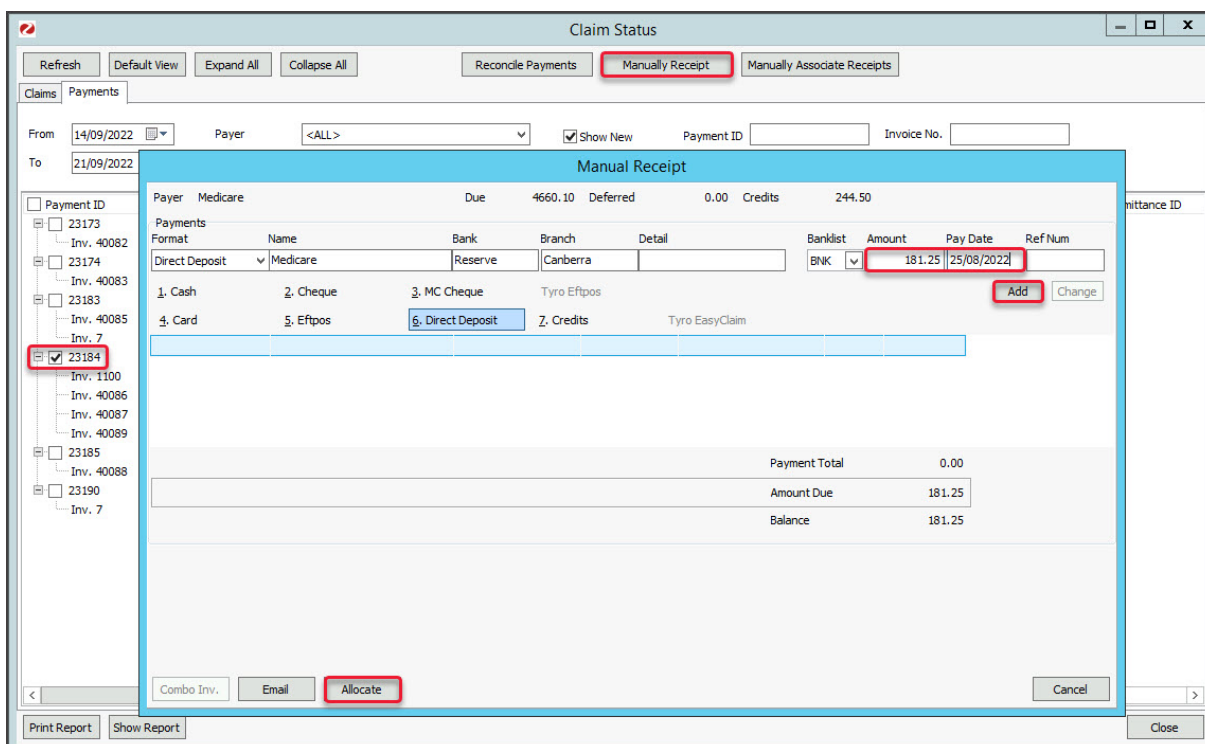

5. Select the tick box next to the **Payment ID**.
6. Select **Manually Receipt**.

An **Information** dialog will show the possible payers.

7. Select the invoices' payer: **Medicare, DVA or Patient**.

The **Manual Receipt** screen will open and show the total payment received for the Payment ID. Check the full amount is shown and update it to reflect the full amount if required. This total will reduce as each invoice is manually allocated to it.

8. A Medicare payment will show as a Direct Deposit with a **Pay Date**. Enter the original payment date into the **Pay Date** field.
9. Select **Add**.
10. Select **Allocate** to start allocating invoices.

The **Allocation** screen will open (screenshot below) and show all unpaid invoices for the type of payer you selected in the Payer's dialog.

11. Select the (first) invoice to be allocated to the payment.

12. Select **Fully Receipt**.

The Account Payer credit will reduce as the invoice is received.

13. Continue with the other invoices with claims covered by the Payment ID and **Fully Receipt** each one.

The screenshot shows the 'Claim Status' application window. At the top, there are buttons for 'Refresh', 'Default View', 'Expand All', 'Collapse All', 'Reconcile Payments', 'Manually Receipt' (highlighted), and 'Manually Associate Receipts'. Below these are filters for 'From' (8/02/2022), 'To' (1/08/2022), 'Payer' (<ALL>), and 'Treating Doctor' (<ALL>). There are also checkboxes for 'Show New' and 'Show Received', and input fields for 'Payment ID' and 'Claim ID'. The main area is titled 'Allocation' and shows 'Account Payer Credits 626.40 On 7 Payments'. A summary row indicates 'Receipt # 57 On 01/08/2022 Banked 45.00 Unallocated Payment 45.00'. Below this is a table of transactions with columns: Invoice#, Date, Patient, HIC, CLM#, Br, Dr, Value, and Outstanding. The table lists several transactions for patients like GAYLE, ANGIOLINA, DARICE, ROMEO, IRVINE, JASPER, CHAPMAN, WILLIAM, CHAPMAN, WILLIAM, BARKER, EMILY, and IRVINE, JASPER. At the bottom, there are buttons for 'Fully Receipt' (highlighted), 'Partly Receipt', 'Close', 'Cancel', and 'Help'. A 'Print Report' and 'Show Report' button are also visible at the bottom left.

Step 2 - Refund the payment and allocate the unallocated credit

When the last invoice has been manually receipted in step 1, you will have an unallocated credit showing on the Allocations screen. This is the amount that Medicare paid for the voided invoice. This payment now needs to be refunded from the doctors/practice bank account to Medicare, and the unallocated credit needs to be allocated in Zedmed.

To refund the payment back to Medicare:

1. Call Medicare's e-business line on 1800 700 199.
2. Advise Medicare that an invalid payment was received.

You will need to provide your Minor ID, which can be found under **Practice Setup > Practice**.

Medicare will collect some details and send you a form to complete.

3. Complete the steps on the form to transfer the invalid payment amount from the doctor/practice bank account to Medicare.

To allocate the credit in Zedmed:

1. Go to Zedmed's **Management** tab.
2. Select **Debtors > Account Payers**.

The **Account Payer Selector** screen will open.

3. Type Medicare into the **Name** field and select **Search**.
4. Select 'Medicare' from the results.

The **Account Payer Details** screen will open.

5. Select **Payment Allocation**.

The screenshot shows two overlapping windows. The top window is titled "Find Account Payer" and contains a form with fields for "Name (Brand)", "Brand ID", and "Current". The "Name (Brand)" field contains the text "Medicare". Below this is a smaller window titled "Account Payer Selector" which displays a table with the following data:

	Name	Address Line 1	Address Line 2	Suburb/Town	Phone
1	Medicare				

At the bottom of the "Account Payer Selector" window are buttons for "Search Not Available", "New", "Select", "Cancel", and "Help". The "Select" button is highlighted with a red box. In the background, the "Payment Allocation" field of the "Find Account Payer" window is also highlighted with a red box.

The **Third Party Account Enquiry/Allocation** screen will open.

6. Select **Payments**.

The **Payment Enquiry** screen will open.

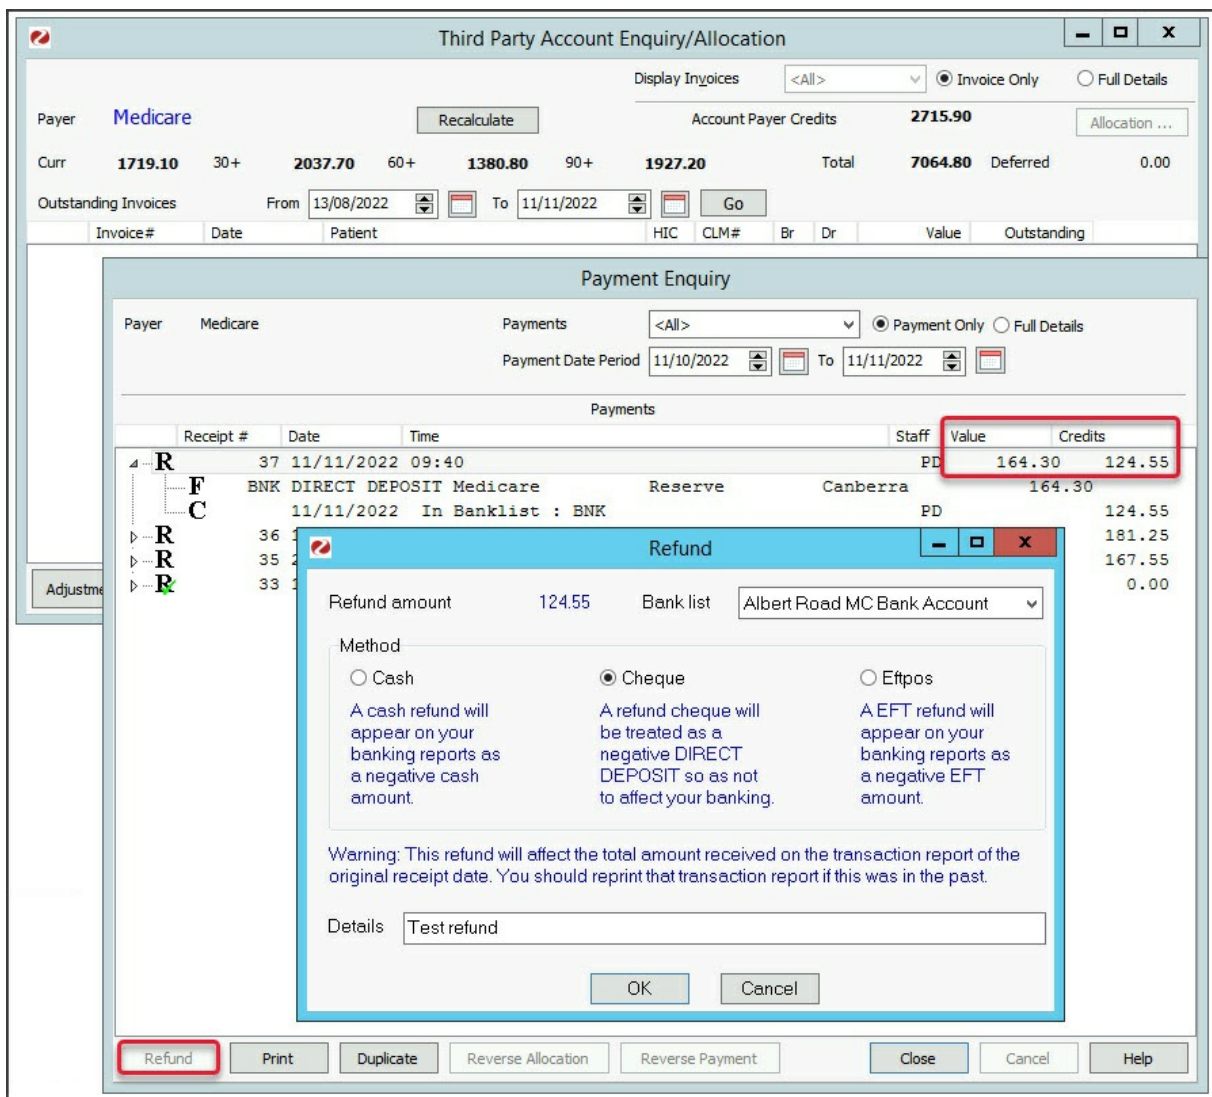

Under **Value** and **Credits**, the receipt will have a credit that has not been allocated to the value.

7. Select the receipt (**R**).
8. Select **Refund**.

The **Refund** screen will open.

9. Select the refund option you will be using: **Cash**, **Cheque** or **Eftpos**.
10. Enter reference information into the **Details** field.
11. Select **OK**.

The credit will be allocated to the value and the **Credits** will show 0.00.

Manually receipt a valid Medicare payment for a voided invoice

This process is for receipting payment advice that includes a valid payment for an invoice that was voided. In this process, you will need to allocate the amount for the voided invoice to a replacement invoice. It is therefore important that the invoice you create is for a legitimate payment for a service that was provided and not a duplicate payment.

Step 1 - Create a replacement invoice

The first step is to create an invoice to replace the one that was voided. Follow this process for each voided invoice that needs to be manually receipted.

To create the invoice:

1. Open the record of the patient who the cancelled invoice was for.
2. Select **Acc Enquiry**.
3. Locate the voided invoice and note down all the items, the service date and the doctor.
4. Close out of Acc Enquiry and now select **Bill** on the patient record.
5. Create a new invoice using the information noted down in step 3.
6. **Suppress** the invoice.

For more information, see Zedmed's [invoicing guides](#).

7. Enter **Acc Enquiry** and note down the invoice number, as you will need to select it in the next step when you assign it to the payment.

Steps 2 - Manually receipt the payment:

The next step is to manually receipt all invoices under the Payment ID, including the invoice that had a replacement invoice created in step 1.

To receipt the payment and allocate the invoices:

1. Go to Zedmed's **Management** tab.
2. Select **Claims**.
3. Select the **Payment** tab.
4. Expand the applicable **Payment ID**.

At this point, you may want to use the Print Report feature at the bottom of the screen to capture all the invoices under the Payment ID, as you will need to manually allocate them in a later step.

5. Select the tick box next to the **Payment ID**.
6. Select **Manually Receipt**.

An **Information** dialog will show the possible payers.

7. Select the invoices' payer: **Medicare, DVA** or **Patient**.

The **Manual Receipt** screen will open and show the total payment received for the Payment ID. Check the full amount is shown and update it to reflect the full amount if required. This total will reduce as each invoice is manually allocated to it.

8. A Medicare payment will show as a Direct Deposit with a **Pay Date**. Enter the original payment date into the **Pay Date** field.
9. Select **Add**.
10. Select **Allocate** to start allocating invoices.

The screenshot shows the 'Claim Status' window with the 'Manually Receipt' dialog open. The dialog displays the following information:

Payer	Medicare	Due	4660.10	Deferred	0.00	Credits	244.50	
Format	Name	Bank	Branch	Detail	Banklist	Amount	Pay Date	Ref Num
Direct Deposit	Medicare	Reserve	Canberra		BNK	181.25	25/08/2022	
1. Cash	2. Cheque	3. MC Cheque	Tyro Eftpos					Add Change
4. Card	5. Eftpos	6. Direct Deposit	Tyro EasyClaim					
Payment Total							0.00	
Amount Due							181.25	
Balance							181.25	

At the bottom of the dialog, the 'Allocate' button is highlighted.

The **Allocation** screen will open (screenshot below) and show all unpaid invoices for the type of payer you selected in the Payer's dialog.

11. Select the (first) invoice to be allocated to the payment.

If you are receipting a voided invoice, select the invoice you created to replace the one that was voided.

12. Select **Fully Receipt**.

The Account Payer credit will reduce as the invoice is receipted.

13. Continue with the other invoices with claims covered by the Payment ID and **Fully Receipt** each one.
14. Once the full amount has been receipted off, select **Close** to exit.

The screenshot shows the 'Claim Status' application window with the 'Allocation' dialog box open. The dialog has a 'Payment ID' list on the left and a main table of invoices. The 'Fully Receipt' button is highlighted in blue.

Invoice#	Date	Patient	HIC	CLM#	Br	Dr	Value	Outstanding
11254	28/03/2022	GAYLE, ANGIOLINA	0004@	MED IF			40.95	40.95
11253	28/03/2022	DARICE, ROMEO	0003@	MED IF			40.95	40.95
