

# Surgical Partners (Archive)

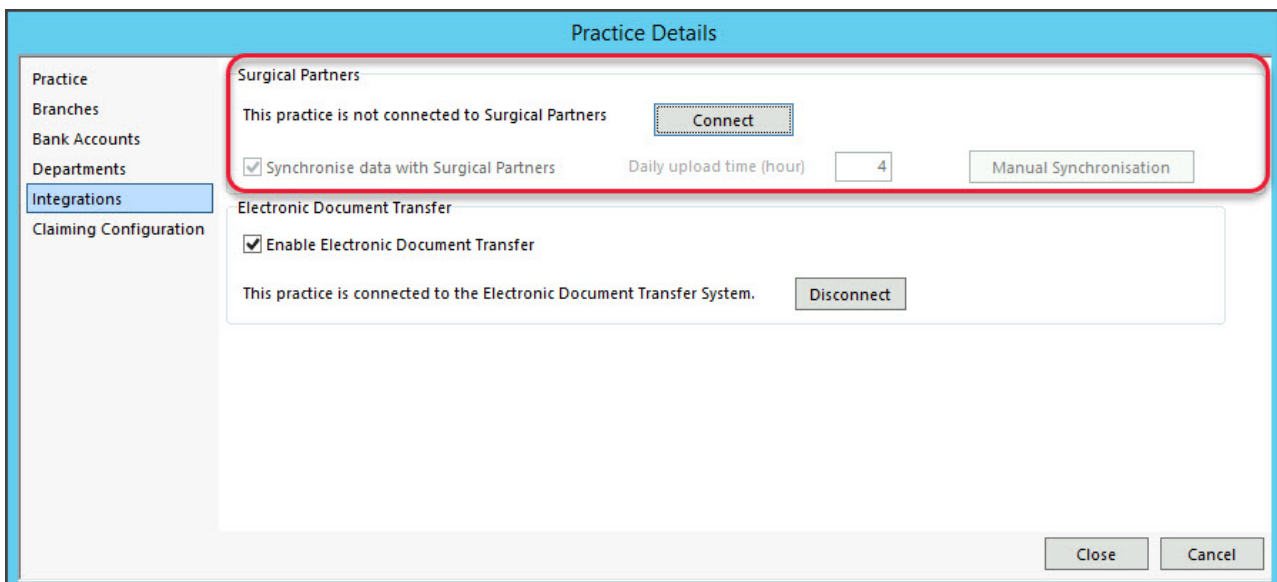

Last Modified on 22/05/2024 3:12 pm AEST

Surgical Partners is a financial management platform that integrates Zedmed with **accounting products** including Xero and MYOB. This allows you to use the financial information in Zedmed for a range of financial applications from debtors' management to banking and payroll. This functionality is enabled by registering with Surgical Partners who will configure Zedmed to send the required financial data to your accounting software each night.

This is a paid service managed by Surgical Partners. To learn more, see <https://surgicalpartners.com.au>.

This Integration is configured by Surgical Partners in the **Practice Details > Integrations** tab under the **Surgical Partners** section.

The **Manual Synchronisation** button can be used to force a synchronisation at any time. To stop the scheduled synchronisation from running, untick **Synchronise data with Surgical Partners**.

The screenshot shows the 'Practice Details' window with the 'Integrations' tab selected. The 'Surgical Partners' section is highlighted with a red box. It contains the following elements:

- Surgical Partners** header
- Status: "This practice is not connected to Surgical Partners" with a **Connect** button.
- Synchronise data with Surgical Partners
- Daily upload time (hour):
- Manual Synchronisation** button

The 'Electronic Document Transfer' section contains:

- Enable Electronic Document Transfer
- Status: "This practice is connected to the Electronic Document Transfer System." with a **Disconnect** button.

At the bottom right of the window are **Close** and **Cancel** buttons.
