

Zedmed v36.5.0

Last Modified on 10/02/2025 1:40 pm AEDT

Upgrading to this version will provide the following features and updates.

To assist with the adoption of these new features, see the [Zedmed v36.5.0 checklist](#).

NEW Electronic signatures

Electronic signatures can now be added to letters and referrals by applying the 'signature image' merge field. Simply save the practitioner's signature as an image file and upload it to their profile. [Learn more](#).

NEW Secure Send

Secure Send is a feature that uses email or ZedSMS to send invoices, documents and referrals (including radiology and pathology referrals) to the patient or payer using a link to a secure download. [Learn more](#). To enable Secure Send, submit a [request form](#).

NEW Automatic recall reminders

SMS recall reminders can now be scheduled to go out automatically using the same process as scheduled appointment reminders in Zedmed's SMS Configuration console. [Learn more](#).

NEW MyMedicare support

MyMedicare is a voluntary patient incentive scheme designed to formalise the relationship between patients and their practitioners. Zedmed can now record and display a patient's MyMedicare registration status. [Learn more](#).

Office	ZED-8766	Resolved Error: Cannot Reconcile Patient - Duplicate Message_ID Fixed a bug that could occur when performing a provisional patient merge. This error would occur when the patient already exists in Zedmed and replied to an SMS before reconciliation occurred.
Office	ZED-8767	Resolved an Error that occurred when adding a patient to an appointment from the waiting list. Fix an error that occurred when adding a patient to an appointment using the cancellation waiting list - if an SMS reminder had already been sent for the existing appointment.
Clinical	ZED-8978	Fixed the Results Inbox sort order The Results Inbox now sorts the results correctly when sorting by the Result Reported Date when you use Get all Results for a Patient button. The Result Reported Date is the date of collection/testing.
Clinical	ZED-8589	New Radiology referral template: iMed Radiology Imaging Specialist The Radiology-MedReferralSpecialist request form is now available as a Radiology Form in Clinical.
Clinical	ZED-8881	New Radiology report template: iMED Radiology - Myocardial perfusion imaging request The report template RadiologyI-MedMyocardialPerfusionImaging is now available in Clinical.

Clinical	ZED-8702	<p>The red lines in Zedmed's modern UI option can be changed to grey</p> <p>Added the ability to change the red lines separating each section in the Clinical UI to grey lines. This is changed in Clinical Tools > My Options > General tab under Line Colour: Red/Grey.</p> 
Clinical	ZED-8728	<p>Removed Measurements from the Clinical document writer's Details Merge fields</p> <p>Removed the outdated "Measurements" merge field from the Clinical document writer's template tools. The "Measures" merge field should be used going forward.</p>
Clinical	ZED-8802	<p>AIR Update - New mandatory field: Vaccine Type (Regulatory compliance update)</p> <p>Added a new field mandatory field called Vaccine Type that will be required for government compliance in March 2024, and expanded the Route option descriptions.</p> 

Send directly to pharmacy option for electronic prescriptions (Regulatory compliance update)

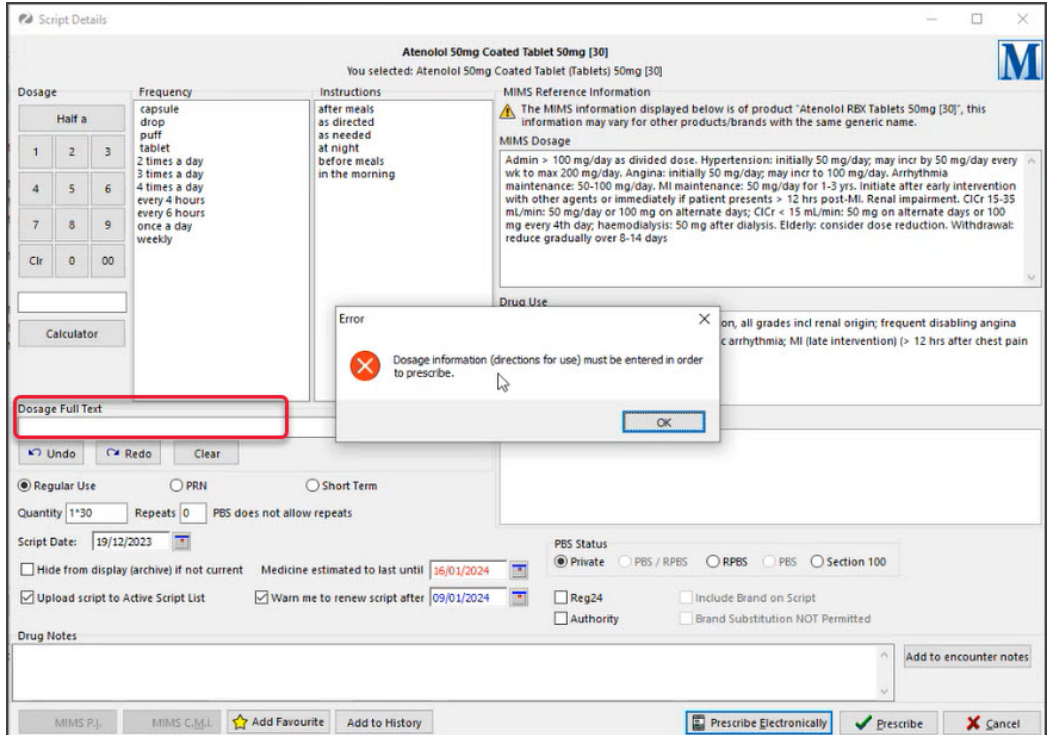

On the Electronic Prescriptions screen, there is now a "Send directly to Pharmacy" checkbox with a reasons drop-down. This option will print out a QR code (token) for the prescription that can be faxed or scanned then emailed directly to the pharmacy. This is for compliance with state and territory legislation that prevents prescriptions from being given to patients for specific controlled substances.

Clinical ZED-8781

The screenshot shows the 'Electronic Prescription' form. On the left, it lists the prescriber 'Dr Phillip Davis RACGP' and patient details for 'Ms Marianna Louise Jones'. The medication is 'Rosuvastatin 5mg Coated Tablet 5mg [30] PUFF' with a quantity of '1*30' and '5 repeats'. On the right, there are fields for 'Route of Administration' (Oral), 'Clinical Indication', and 'Minimum Repeat interval (days)'. Below these are options for 'Electronic Prescribing Token delivery', including 'SMS' (selected), 'Email', 'No Electronic Token', and 'Print Paper Token'. A red box highlights the 'Send prescription direct to Pharmacy' checkbox, which is currently unchecked, and a 'Reason' dropdown menu set to 'Dosing Point'. Below this, a note explains that this option prevents the patient from receiving the token and is intended for paper tokens printed and provided directly to the pharmacy, due to state and territory legislation for controlled substances. At the bottom right, there are 'Prescribe Electronically' and 'Cancel' buttons.

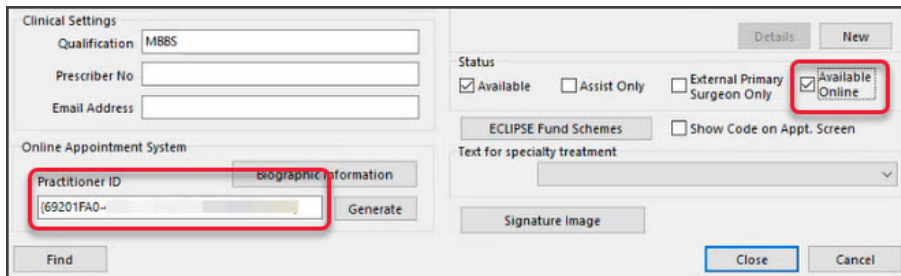

Clinical ZED-8840

Dosage information is now mandatory for all prescriptions (Regulatory compliance update)
 Prescribing now requires dosage information in the Dosage Full Text field. This is a compliance update for electronic prescribing that has been applied to all scripts.

OLA ZED-8650 ZED-8649

New Practitioner ID option as an alternative identifier for Online Appointments.
 Zedmed can generate a Practitioner ID so a doctor can be set up for Online Appointments. This is ideal for treating doctors without an HPI-I. The Practitioner ID is assigned in the doctor Details screen, along with the Available Online setting for OLA.

OLA ZED-8654

Patients must now choose an appointment type in Online Appointments
 Online Appointments no longer has a default appointment type. Patients must select an appointment type to create a booking, ensuring they book for the intended appointment type. This prevents patients from booking the incorrect appointment type and allows you to only give new patients a new patient appointment type.

Zedmed v36.3.4

Upgrading to this version will provide the following updates.

Clinical	ZED-8867	Resolved Error: Item not found when closing a patient file in Zedmed Clinical. This error occurred when opening a patient in Clinical from Office, if Clinical had not been shut closed properly.
Clinical	ZED-8886	Resolved Error: List Index (1) out of bounds. This error also occurred when opening a patient in Clinical from Office, if Clinical had not been shut closed properly.
Clinical	ZED-8865	Resolved Error: Unsatisfied constructor on type: MyHealthRecord.Conversion.TMhrDocumentView. The error occurs when trying to view a result that has been added to the summary view from My Health Record.
Upgrader	ZED-8882	Resolved Issue with Zedmed Upgrade file v36.3.3 The error prevented some users from upgrading.

Zedmed v36.3.3

NEW HealthShare integration

The Clinical Address Book is now integrated with [HealthShare](#) so practitioners have access to Australia's largest Specialist and Allied Health directory when sending letters and referrals. This feature requires internet access. Learn more in our [HealthShare guide](#).

NEW Intramail search

There is now a search option in Office and Clinical Intramail so you can search your inbox and sent items for mail using the sender's name, subject, date range or a linked patient. Learn more in our [Intramail guide](#).

NEW Editor for Office templates

For customers who do not have Microsoft Word, we have added a Zedmed RTF editor so you can create custom Office templates. This is useful for on-premise customers moving to Zedmed Cloud. Learn more in our new [Office templates guide](#).

Banking Report enhancements

10 updates to Zedmed's banking reports to improve clarity and consistency.

Office	ZED-8409	Support has been removed for 3rd party SMS providers Support for "SMS Everyone", "Inspirus" and "Other"(generic) SMS providers has been removed. ZedSMS replaces these providers for the sending of SMS messages from Zedmed.
Office	ZED- 8832	ZedSMS performance updated The ZedSMS SendPoint was updated to improve the send and receive speed of SMS messages.
Office	ZED-8466	ZedSMS Purchase Link updated Updated link to purchase credits for ZedSMS due to the change in supported providers. It now points to the ZedSMS Message Centre .

Banking Report enhancements

The following enhancements have been made to Zedmed's Banking reports:

- Removed unused **HealthPoint** sections from bank reconciliation, deposit & session reports.
- Widened the payer name column **On behalf of** to accommodate longer names.
- Renamed the 'Bank Reconciliation Report' heading from **Reversals** to **Cross-Session Reversals** to reflect the data presented more accurately.

Office	ZED-8463	<p>Changed the Banking Reconciliation Report date format The Banking Reconciliation report now consistently uses "dd/mm/yyyy" as the date format.</p>																																																																								
Office	ZED-8500	<p>Changed the date format for Reversals on banking reports Reversal transactions printed on banking reports now use "dd/mm/yyyy" as the date format.</p>																																																																								
Office	ZED-8432	<p>Resolved an error encountered when canceling an invoice without a service record This error occurred when creating an invoice, adding then removing a service and then trying to delete the invoice. This error will no longer occur as the action buttons will be disabled when no service items are in the service item list or in the add service item box.</p> 																																																																								
Office	ZED-8436	<p>Resolved performance issues caused by an HI service outage This fix prevents the Patient records from loading very slowly during the opening of multiple patient records when the HI service is down. The IHI check should now be run in the background for each individual patient without slowing down the UI performance.</p> <p>Additional information has been added to the MHR Status section of the patient record and will display when the IHI check is running and if the check times out it will update to display this information.</p>																																																																								

Office	ZED-8480	Resolved an issue that caused a Patient's name to be cut off on the Patient Letter pick list. In the Patient Pick List Dialog - Last letter of Family name was cut off due to the font style.
Office	ZED-8530	Fixed Error 'Midnights not a valid time,' on the Waiting Times report. Fixed an issue where an error was displayed when Midnight was selected as the End Time on the Waiting Times report.
Office	ZED-8534	Resolved an issue that caused a patient's pronoun to disappear Fixed an issue where clinic-defined pronouns (dropdown list management) could disappear from the pronouns selected for a patient.
Office	ZED-8594	Resolved Booking Wait Time Report issues The Booking Wait Time report will now display changes from the last edit made to an appointment. Additionally, the report has been fixed to prevent an error when running the report for a single patient.
Office	ZED-8596	Resolved an issue with the Date Details display in Linked Appointments The Linked Appointment Details dialog has been updated to use text formatting consistent with the rest of the application. This resolved Linked Appointment Details - Date Details overlap
Office	ZED-8598	Resolved issue that cut off the Patient Type details in the Appointment and Attendance Details dialogs The Patient Type in Appointment Details and Attendance Details screens no longer overlap the screen. 
Office	ZED-8657	An Assist Fee can no longer be used with non Assist able item When setting a billing item as an assisted item that is not an assistable item, the Assisting Billing Options screen is no longer displayed.
Office	ZED-8658	Resolved an issue with the Service date and Billing date range in the Assistant Service Report. Fixed the date picker button for "To date" on the Assistant Service Report so that the date selected is displayed in the To field and not the From field.
Office	ZED-8659	Fixed the layout of the reprint token message box. Removed an incorrect line in the message displayed when reprinting an eScript token
Office	ZED-8772	Office will still run if the cancel button is clicked on the Login screen. Fixed issue where Patients.exe would crash when Office was closed without logging in first (i.e. opens Zedmed Office, then closes the login prompt to exit, without logging in).

Office	ZED-8777	Selecting F4 twice will once again bring up the last patient searched. Fixed issue where if a patient is associated with more than one branch selecting F4 twice (or clicking on Last button) did not open the last patient.
Office	ZED-7492	Staff Username truncates to 10 characters automatically The "Edit Staff Member" dialog now prevents users from entering usernames greater than 10 characters in length.
Clinical	ZED-8483	Added an Ethnicity field to Zedmed Clinical Capturing or viewing a patient's ethnicity details has been added to the Family, Social & Past History information in Clinical.
Clinical	ZED-8544	Resolved UI Issues in Clinical Reports Fixed some minor issues with font sizes and labels being cut off in the Clinical reports, including Font Types or Font Size and Labels being cut off.
Clinical	ZED-8552	Updated the Intramail UI in Clinical Clinical intramail buttons and icons have been updated on main dialog to match those in Office.
Clinical	ZED-8561	Fixed the Results Inbox Error: Unexpected end of command-line 2, column 1 Results Inbox has been fixed to prevent an error when retrieving results for all doctors on clinics with a large number of doctors configured.
Clinical	ZED8574	Enabled a configuration to limit attachments tab file size in clinical Added a maximum value in MB's for uploading of files to tabs in the summary views and set the default. This can be found in the Global Options > General tab.
Clinical	ZED-8595	Turned on Icon captions by default in Zedmed Clinical Encounter icon captions are now turned on by default for users logging into Clinical for the first time.
Clinical	ZED-8630	Resolved a formatting Issue When Copying Clinical Notes to Letter Writer Added a new Paste Plain Text option to the Letter Writer to allow formatted text such as encounter notes to be copied and pasted into a letter without formatting.
Clinical	ZED-8633	Introduced a Filter Feature for Merge Fields in Letter Writer The Clinical Letter Writer now provides a filter function in the data toolbar, allowing for a quick look-up of a field in the list of available merge fields.
Clinical	ZED-8687	Resolved an access violation in module 'crs_client.exe' when closing Patients in Clinical. Fixed an issue where an AV error was displayed in some cases after closing a patient file in Clinical where My Health Record is enabled.

Clinical	ZED-8778	The Write referral button in HealthShare will now only be an option in Referrals. Removed the "Write Referral" button from HealthShare address book search when opening the search screen from the main toolbar in Clinical.
Upgrader	ZED-8614	Removed obsolete Zedmed files and exe from the Installer/Upgrader The Zedmed Upgrader has been enhanced to remove obsolete files from client installations.

Zedmed v36.1.1

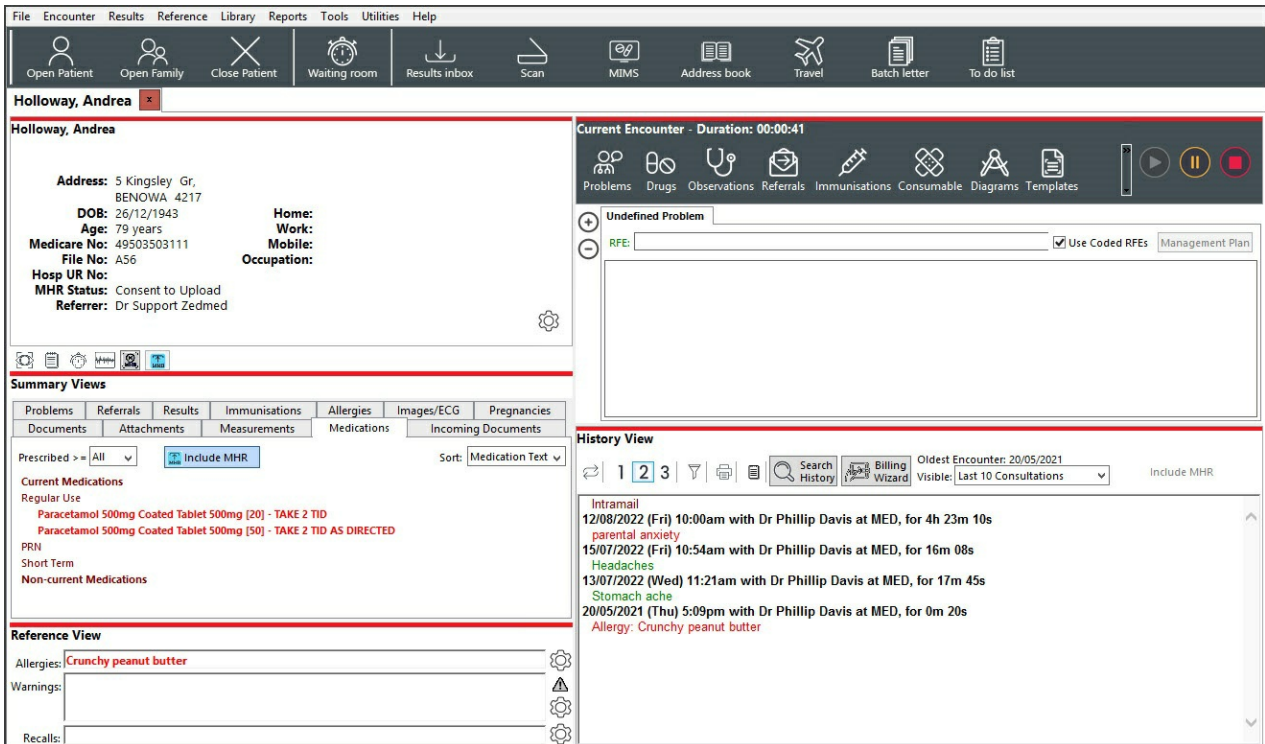

Clinical	ZED-8668	PDF viewer unable to view the document - Blank Document Fixed an issue that may prevent the viewing of older PDF files, especially those produced by scanning documents
----------	----------	---

Zedmed v36.1.0

Zedmed 36.1.0 is a major release that introduces a modern theme, integration with accounting software including Xero and MYOB, HealthLink SmartForm enhancements and pronoun and gender updates.

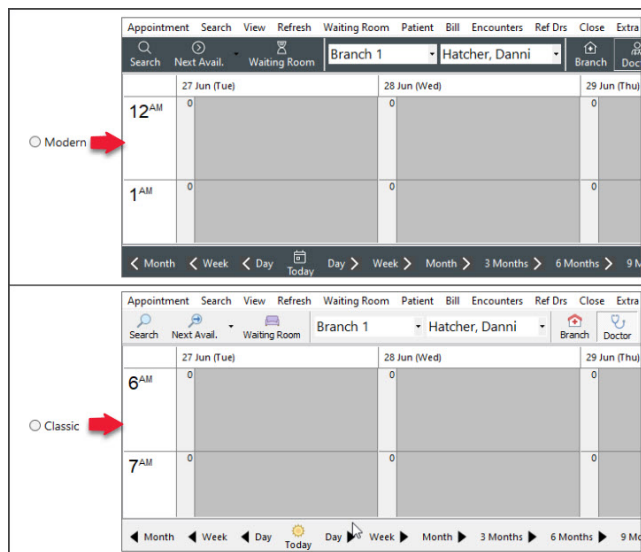

New modern theme

No menus or layouts have changed, but you now have the option to use the new Modern theme or the existing Classic theme.

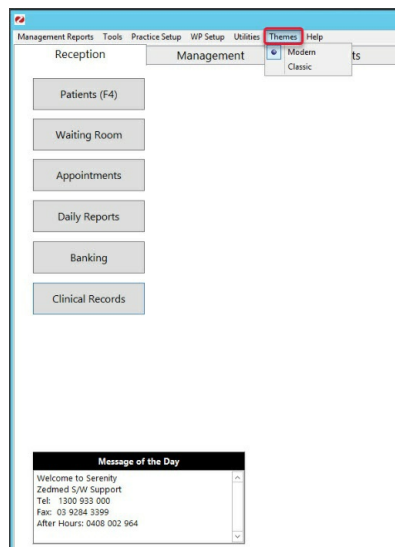

- **The first time** you open Office and Clinical after the upgrade, you will be prompted to choose a theme.
- You can have matching or different themes in Office and Clinical.
- You can swap themes at any time if you change your mind.

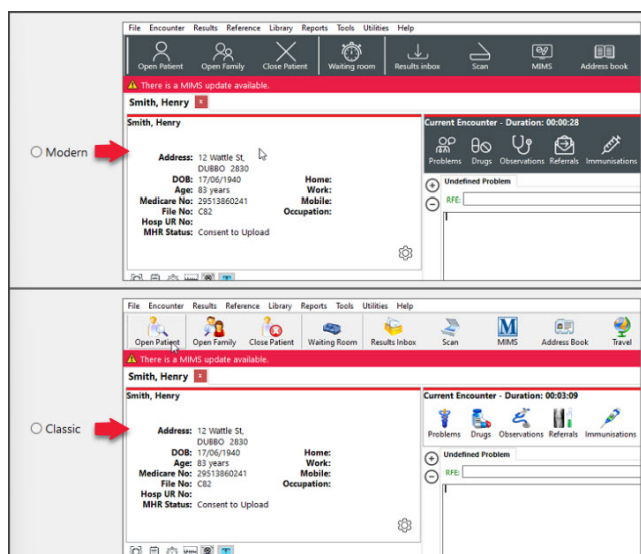

The first time opening Office - select Modern or Classic.

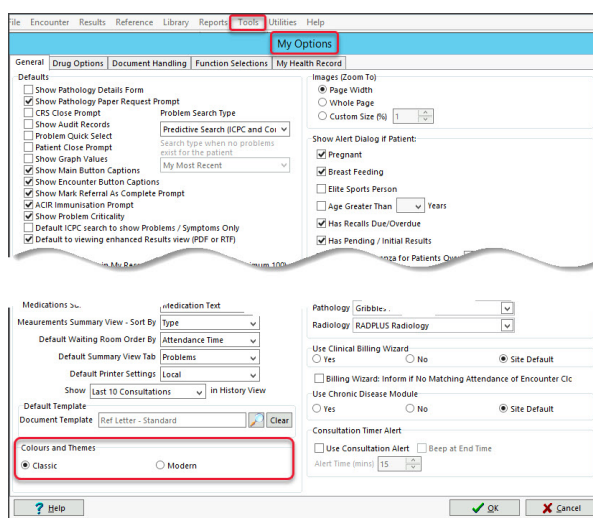

To change - Themes > Modern or Classic.

The first time opening Clinical - select Modern or Classic.

To change - Tools > My Options > Modern or Classic.

Surgical Partners integration

Surgical Partners is a financial management platform that integrates Zedmed with **accounting products** including Xero and MYOB. This allows you to use the financial information in Zedmed for a range of financial applications from debtors' management to banking and payroll. This functionality is enabled by registering with Surgical Partners who will **configure Zedmed** to send the required financial data to your accounting software each night.

To learn more, visit <https://surgicalpartners.com.au>.

Zedmed v36.1.0 **Updates** (part of the v36.0.0 release)

Clinical	ZED-8328	Implemented a new PDF tool to view results and scanned documents in Clinical Removed the requirement for Adobe Reader from Zedmed. PDFs can now be viewed (both when embedded in a result and when attached from a scan) without any external PDF viewer installed.
Office	ZED-8252	Access Violation error resolved when deleting an Appointment Type Fixed an error that occurred when attempting to delete an appointment type from Office
Office	ZED-8360	Corrected the Message/Buttons displayed when a Tyro Easyclaim has been canceled. The message displayed when a user canceled a Tyro Easyclaim has been resolved and the form now allows another attempt.
Office	ZED-8423	Deleted prescriptions are no longer displayed on HealthLink Forms. Deleted prescriptions were still showing up as selectable options in the HealthLink SmartForm.
Clinical	ZED-8452	The Encounter Timer no longer disappears when resuming an encounter. Fixed an issue where the Clinical Encounter timer would no longer be displayed after resuming an existing encounter.
Office	ZED-8481	Updated the Appointment and Full day icons for the Modern Theme. Updated the icons displayed on the Appointment Grid for Appointment and Full Day menu bar options so they are no longer similar to Zoom In and Zoom Out icons.

Zedmed v36.0.0 HealthLink SmartForms **enhancements**

For new users, please follow the Zedmed SmartForms **installation guide**.

For existing users, please follow the **manual upgrade guide**.

Clinical	ZED-8267	<p>Improved the names used for attachments in SmartForms Each HL7 results file can include several sections, and Clinical Results Inbox displays them as follows:</p> <ol style="list-style-type: none"> 1. Result View tab. 2. Enhanced View tab - HL7 file includes only 1 additional part. 3. Enhanced View #N - HL7 file includes N additional parts. 4. 2 and 3 are not always present, depends on HL7. <p>Results in HL7 files added as attachments to a SmartForm will be named as follows:</p> <ol style="list-style-type: none"> 1. <HL7 FResult Name> (Result View) tab. 2. <HL7 FResult Name> (Enhanced View) tab - HL7 file includes only 1 additional part. 3. <HL7 FResult Name> (Enhanced View #N) - HL7 file includes N additional parts. <p>2 and 3 are not always present - depends on the HL7.</p> 
Clinical	ZED-8292	<p>Zedmed's Healthlink SmartForms integration is now upgradeable The Healthlink SmartForms service installer has been updated from an MSI into an exe file (as used by other parts of the Zedmed software) so the software is now upgradeable.</p>
Clinical	ZED-8332	<p>Healthlink SmartForm will display 1 attachment for HL7 files with 2 records The functionality of Zedmed's HealthLink SmartForms integration has been improved. HL7 results that include PIT segments in addition to FT segments will be included as one attachment (as it is done in Clinical, Results).</p>

Clinical	ZED-8379	<p>The 'HealthLink Create Referral' button can be removed from the Encounter toolbar</p> <p>Doctors can now remove the 'HealthLink Create Referral' button from the encounter toolbar. This is done in Clinical > My Options > Function Selections tab > Show the HealthLink button.</p> 
Clinical	ZED-8387	<p>Resolved a scenario where a staff name could appear as the provider in a SmartForm</p> <p>Resolved an issue that caused the provider details (Referred By name) in a HealthLink SmartForm to be populated with a staff member's details instead of the provider's details, when the staff member's ID was the same as the doctor's code.</p>

Zedmed v36.0.0 Office & Clinical **enhancements**

Clinical	ZED-7979	<p>New Pathology & Radiology referral templates added to the Clinical Addressbook for:</p> <ul style="list-style-type: none"> • Australian Clinical Labs Comprehensive Carrier Screen Request = PathologyClinicalLabsCCS • Queensland Ultrasound for Women = RadiologyQUFW • Sydney Ultrasound for Women = RadiologySydneyUltrasoundForWomen • Vision Radiology = RadiologyVisionCardiac 
		<p>Pronoun field added to Zedmed Office & Clinical</p> <p>Added support for specifying preferred pronouns to Zedmed. Pronouns can be set in either the Office or Clinical Patient Details forms and are displayed in the following locations.</p> <ul style="list-style-type: none"> • The selected pronouns will appear when chosen in the patient record Pronouns drop-down. • Enabled at practice and branch level. • Additional pronouns can be added in Practice Setup > Drop-down List Management> Pronouns.

Pronouns display:

- The header of patient details summary in Clinical.
- Title of patient details in Clinical.

- Patient record tab in Clinical.
- Title of patient details in Office.

Pronouns & Sex at Birth

Office ZED-8194

Changed "Gender" to "Sex at Birth"
 Changed the "Gender" field to read "Sex at Birth" in Office, Clinical, and the Patient Merge utility.
 See the screenshot above.

Office ZED-8202

Ethnicity is available in the Patient Merge utility
 Ethnicity is now available in the Patient Merge utility when merging duplicate records. It is displayed when Advanced is selected.

Office ZED-8215

Changed the default dose for Prevenar 13 Childhood immunization
 Updated the dose from 4 to 3 for the 12-month Pneumococcal (13vPCV) Childhood Scheduled Immunisation.

Clinical ZED-8215

Office ZED-8326

Added the Service date to the Claims screen and Claims Report
 Claims Status UI and report now show the date of the service against each item in the invoice.

Inv/Service/Assessor	Date Inv/Service	Status	Patient	Outstanding	Paid	Doctor	Claim ID	Medicare
Inv 103015	18/07/2023	WITH ME...	Simkins, Talia	\$331.50	\$0.00	Augustus Eason	211307	211307
116	4/07/2023	Unpaid		\$110.50	\$0.00			
116	11/07/2023	Unpaid		\$110.50	\$0.00			
116	18/07/2023	Unpaid		\$110.50	\$0.00			

Office	ZED-8370	<p>Replaced the PDF viewer for the "View Claim" button in Account Enquiry Updated the application used to view PDFs in Office for Claims. Viewing a claim from the account enquiry screen is now significantly faster.</p> 
--------	----------	---

Zedmed v36.0.0 Office & Clinical updates

Clinical	ZED-8286	<p>Important update. Reduced the flicker on the Results Inbox display list Results Inbox module has been reworked to prevent flickering as users action results.</p>
Office	ZED-5462	<p>Resolved an error that occurred when merging patients with the same SMS message When merging patients that reference the same SMS message, Zedmed Patient Merger will now only move one copy the message to the merged record. Previously it would report an error and abort the merge process.</p>
Office	ZED-5494	<p>The Last (F4) Button now works in Appointments While searching for patients on the Appointments UI, selecting the Last F4 button now selects the last opened patient in the appointment search dialog.</p> 
Office	ZED-7111	<p>The Delete button in Staff Maintenance>Apps Access no longer causes an Access Violation The Delete button on the staff permissions maintenance dialog, App Access tab, will now remain disabled until a selection has been made to prevent an error.</p>

Office	ZED-7982	<p>Resolved Error Data too large for variable [ITEM_CODE]. Max len = [8], actual len = [9] when running AMA Fee Load The Load MBS/AMA Item By Criteria option now works when the Load from AMA file checkbox is selected and an AMA load fee file is used. AMA fees will now be loaded as long as the corresponding MBS item already exists, a report is displayed at the end of the import listing the items that could not be imported.</p> 
Office	ZED-7983	<p>Resolved Error - Param [NEWSTARTDATE] type changed from [ftSQLTimeStamp] to [ftDateTime] running AMA Update Fees The Update Existing MBS/AMA Items with the Load from AMA file option selected will now run without error and enable the update AMA items.</p>
Office	ZED-8233	<p>Statistics report - Referral Doctor criteria now correctly lists all address book entries (not just referral doctors) Referral Doctor criteria in the Statistics Report will now only list Referral Doctor contacts who are set as Available.</p>
Office	ZED-8247	<p>Resolved Error "Zedmed Office was unable to load the OLE object file" when you Select or Preview an archived letter Fixed the issue with an error being displayed when selecting or previewing patient letters that have been archived.</p>
Clinical	ZED-8248	<p>Resolved Error 'Type ID Mismatch' when importing CDA letters When importing HL7 messages that contain XML files with a namespace prefix, Zedmed Clinical will report a more accurate error instead of returning "Type ID mismatch".</p>
Office	ZED-8362	<p>Resolved an Intramail error in Sent Items Fixed an error that occurred when viewing sent items in office intramail when the To: or CC: fields contain a combined total of more than 1000 characters.</p>

Office	ZED-8367	A double booking Patient's name will no longer change when editing the appointment. Modifying an appointment by selecting it from the appointment selector (appointment 'Details' context menu option), no longer displays a different patient in the appointment selector at the end of the process.
--------	----------	--
