25 June eRx requirements

Last Modified on 26/07/2024 2:05 pm AEST

The erx.com.au :8830337559 certificate is expiring on 25 June 2024 and the eRx Adapter must be updated to ensure continued operation of the eRx service.

HTTPS will use a different port and the eRx web address will change to HTTPS. If you use a firewall with port/internet restrictions, you may need to open a new port to support the new endpoint.

Zedmed v36.6.8 will update your eRx certificate and change the communication endpoint from HTTP to HTTPS.
