

Tyro create API password

Last Modified on 10/09/2024 1:49 pm AEST

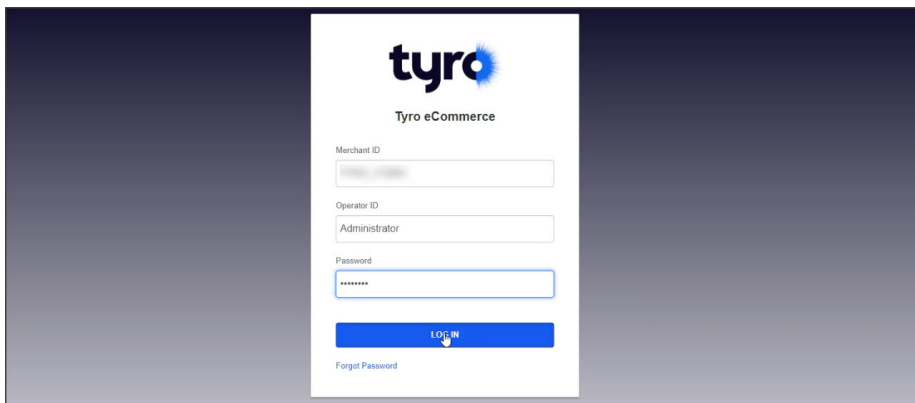

Each entity receiving payments through a Tyro eCommerce account must create a Tyro API password. This password is linked to the entity's MID and bank account in Zedmed, as explained in the [Payment Gateway setup guide](#).

The API password is created using an option in the eCommerce account. To use this option you must first create an Operator account and log in as an Operator as explained in the steps below.

To create an API password:

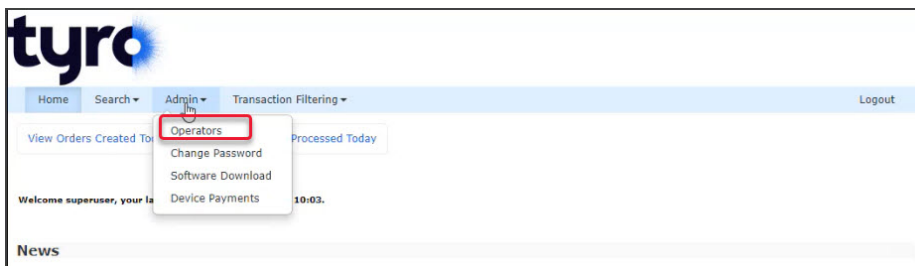

1. Login to Tyro's eCommerce portal with the credentials provided by Tyro for your eCommerce account.

URL: <https://tyro.gateway.mastercard.com/ma>

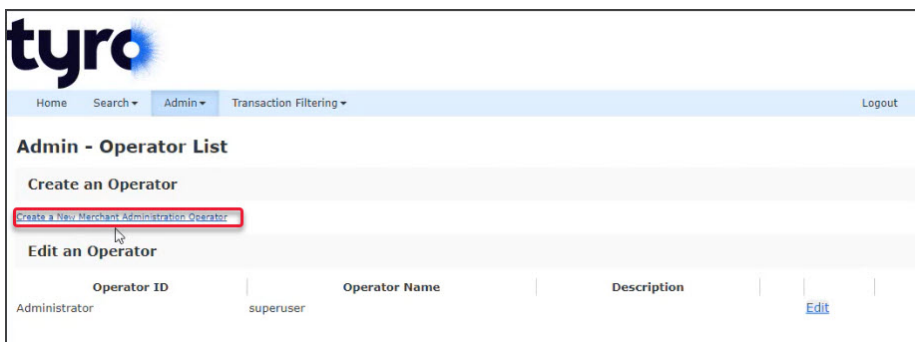

You will be logged into the Tyro eCommerce portal.

2. Select **Admin > Operators**.

3. Select **Create a New Merchant Administration Operator**

4. Fill in the **Operator Details**.

- **Operator ID** - enter a logical name. E.g Integrations.
- **Operator Name** - you can use the same word used for the ID. E.g Integrations.
- Enter and confirm the password.

The screenshot shows the 'Admin - Operator Details' form in the Tyro system. The form is titled 'Operator Details' and contains the following fields and options:

- Merchant:** TYRO_172691
- Operator ID:** Integrations
- Operator Name:** Integrations
- Description:** (empty)
- Password:** (masked with dots, strength indicator shows 'Weak')
- Confirm Password:** (masked with dots)
- Email Address:** (empty)
- Locale:** English (United States)
- TimeZone:** Australia/Melbourne

A password strength tooltip is visible, stating: 'Password must include: At least one character from the following categories: Numeric digit, Special character'.

5. Further down the page, add the required permissions.

- View Report Pages
- Download Order Search Results.
- May Configure Integration Settings.
- May Configure Integration Settings.
- May Configure Email and Webhook Notifications.

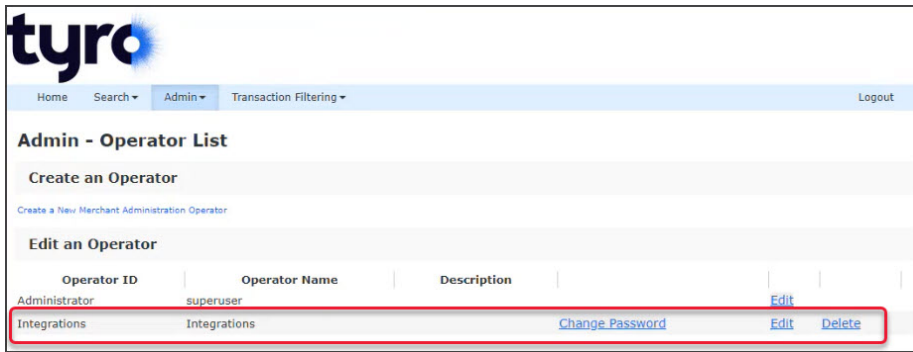

The screenshot shows the 'General' permissions form. The permissions are listed as follows:

- View Report Pages
- Download Order Search Results
- Download Transaction and Payment Authentication Search Results
- Allow Merchant Administration Documentation Download
- May Perform Risk Assessment Review
- May Bypass Risk Management
- May Configure Transaction Filtering
- May Configure Integration Settings
- May Configure Reporting API Integration Settings
- May Configure Email and Webhook Notifications
- May Maintain Tokens
- May View Dashboard

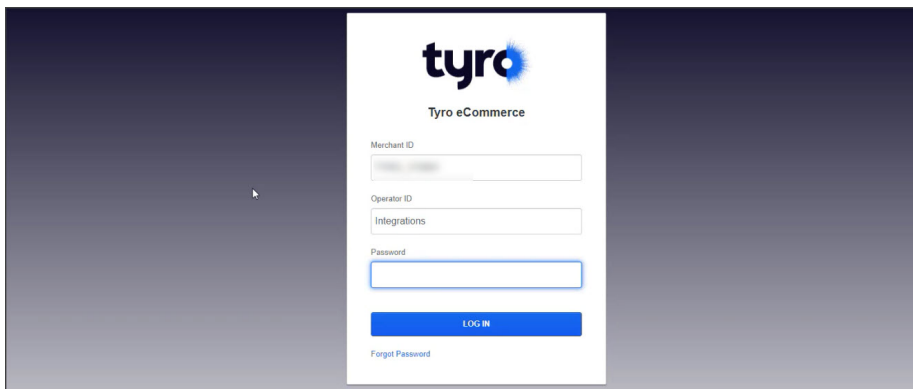

Buttons for 'Cancel' and 'Submit' are located at the bottom left of the form.

6. Select **Submit**.

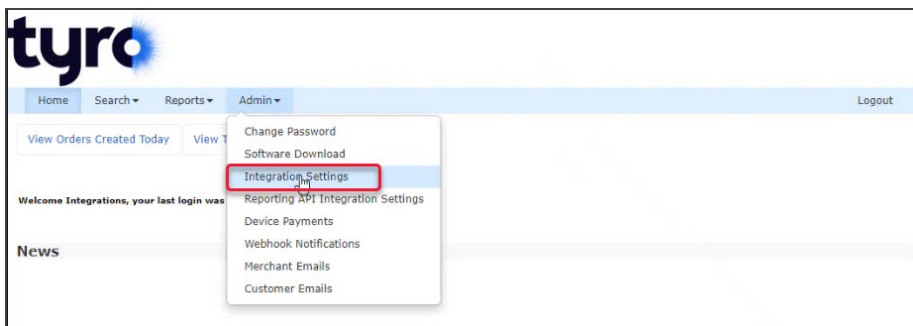

You will now see the new account in the Operator list.

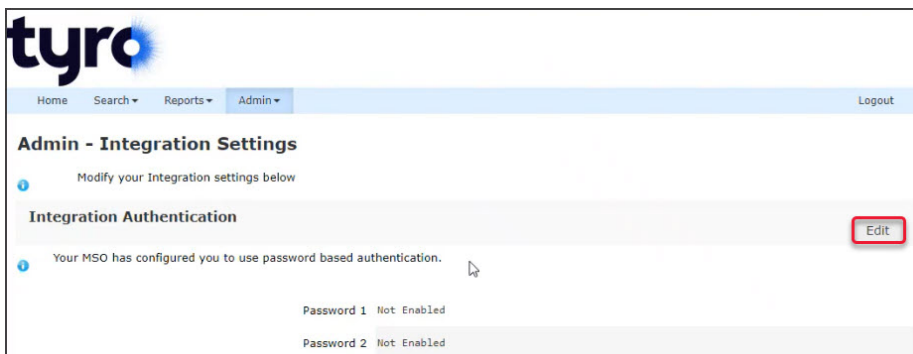

7. Logout.
8. Login with the new Integrations account using the credentials.

9. Select Admin > Integration Settings.

10. Select Edit.

11. Tick the Password 1 box to enable this new API Password
12. Select **Generate New**.
