

Full Payment Gateway guide

Version: 1.03 | Last Modified on 22/01/2026 12:08 pm AEDT

This guide explains how to use Payment Gateway to request Credit Card information when booking an appointment and how to Bill a patient using the ePayment option.

Considerations

- When a patient provides a credit card, its validity is checked before the card is accepted.
- The Payment Gateway options only display for practices with Payment Gateway enabled.
- If a NOK provides a credit card for a child, that card will be added to the child's profile and can be selected when billing.
- Once a credit card is provided, it will be available for billing until the card expires.
- OLA bookings have a cloud icon and a credit card icon in the Appointment Grid if the patient already has a credit card via OLA. Learn more.

To learn more, see our [Payment Gateway FAQ](#)

To learn about Payment Gateway with OLA, see the [OLA Bookings guide](#).

For onboarding and setup, see the [PG admin guides](#).

Requesting a credit card

Staff can request credit card information using an SMS and patients can be asked for a credit card when using OLA.

When a patient is using Online Appointments

- See the [OLA booking with PG guide](#).

When staff are booking an appointment

Office staff can send an SMS to the patient requesting credit card information if the patient does not have a card on file. The Appointment Details screen will show a credit card icon if a card is already on file and does not need to be requested.

When the patient provides the credit card, it is verified and a credit card icon will be displayed next to their name in the Appointment Grid, it can then be used for billing future appointments.

To request credit card information:

1. From the **Appointment Grid**, search and make an appointment for a patient.
2. In the **Appointment Details** screen, check if there is a credit card icon. If there is no icon, there is no valid credit card on file.
3. When no credit card is on file, select the arrow beside **Close** and select **Close & Request Payment Card**.

The appointment will be created, and the patient will receive an SMS asking them to enter credit card information.

If the patient does not have a mobile phone in their patient record, a warning will advise the request cannot be sent.

Close & Request Payment Card

You can also send a payment card request to an existing appointment:

1. Confirm there is NO credit card icon to the right of the appointment. The example shows where the icon will display.

2. Right-click the appointment and select **Request Payment Card**.

Billing a patient

To bill a patient, follow the **private patient billing process** and select **ePayment** for the payment type as shown below. This will use credit card information that will have been added to the patient record via an SMS card request or an OLA booking.

- For Payment Gateway, the **patient** is always the payer.
- Billing will use **QuickPay** however MA Online is also supported if a rebate is required.
- The invoice must have the correct treating practitioner so the correct Bank List receives the payment.

To bill the patient:

1. Follow the private patient billing process ensuring that the patient is the payer.
2. **Important:** Check the correct treating practitioner is selected.

Tryo sends the payment to the bank account linked to the treating doctor. This could be the practice or the doctor's account.

3. Select **QuickPay**.
4. Select **ePayment**.

The ePayment dialog will display the cards recorded for the patient and the patient's email address.

Email considerations:

- By default, the receipt will be sent to the patient's email address. You can untick this option in the dialog.
- You can add email recipients using a comma separator, for example, the payer's email address.
- If you select **Update patient email**, it will use the email entered to update the patient's record.

5. Select the card to use.

If there is only one card, it will be selected by default.

Card considerations:

- Credit cards are ordered by the last card added.
- The selected card will have a dark grey highlight.
- If the appointment was booked in OLA, the card provided will be selected by default and have a card icon next to it.

Payment Cards				
Account Payer	Card Type	Card Number	Expiry	Valid
Gilmour, David	MONSTERC...	XXXX XXXX XXXX 9876	06/27	✓

- A child with no credit card on file will show the parent's credit card/s if the parent is listed as a payer.
- All credit cards on file will be listed in the patient's record and show the payer's name.
- The credit card's last 4 digits are shown so you can confirm the card with the payer.

6. Select **Bill**.

The ePayment dialog will close and a confirmation message will appear on the Quickpay screen.

You can now process MA Online or ECLIPSE as required.

Claiming a rebate (MA Online)

When a patient pays using Payment Gateway, a claim can be submitted using MA Online.

1. Follow the standard private patient billing process but use ePayment as the payment method (not EasyClaim).
2. Then select **MA Online** and complete the **Interactive claim** screen then select **Send** to transmit the request to Medicare.

The MA Online steps are outlined in the Private Patient invoicing guide, starting **from step 10**.

Taking a pre-payment

Step 1 - Take the prepayment

1. Open the patient's record.
2. Select **Receipt**. Opens the **Receipt Payment** screen.
3. Select **ePayment**.
4. Check the correct bank list is selected.
5. Enter the payment amount **Amount**, select Tab on your keyboard.
6. Select **Add**.
7. Select **Allocate**. The **Allocation** screen will open.
8. Select **Cancel** as there is no invoice to allocate the payment to.

Managing credit cards and card requests

Message manager

The Message Manager shows SMS payment card requests as **Payment Details link**. There is a **Message Category** filter for Payment Details requests.

The screenshot shows two windows. The top window is 'Message Manager' with a grid of messages. The bottom window is 'Message Details' with a message content area.

Message Manager Grid Data:

Date	Date/Time	Patient	To/From	Status	Category	Response	Error	Action Status	Actioned On	Action

Message Details Content:

Please add credit card details for Branch 1 <https://stage.paymentgateway.systems/card-details/ec4d080c-95e7-4582-b4e6-fa0016b06004>

Patient Record

In the patient's record, the **Payment Cards** menu displays all registered cards. Only the card type, last 4 digits and expiry date are recorded.

The Valid field

This is based on the expiry date and will have a tick if the card has not expired. If the payment does not have a valid card, a credit card icon will not appear on the appointment screens.

The Remove button

This button removes the highlighted card. To Remove a card, a user must have the **Administrator** role or the security Function 'Patient Records' > 'Patient Details- Payment Cards (Edit)'. If you add this Function, please wait an hour for the API to update or contact Zedmed Support for an API restart.

The screenshot shows the 'Patient Record' window with the 'Payment Cards' tab selected. It displays a table of registered cards.

Payment Cards Grid Data:

Card Type	Card Number	Expiry	Valid
MASTERCARD	XXXX XXXX XXXX 0008	01/39	✓

Buttons:

- Request Payment Card
- Remove
- Delete
- Print
- Patient Verification
- Find
- Close
- Cancel

If the card was provided via Online appointments, there will be a credit card icon next to the Card Type in the Quick Pay > Card selection screen. The card will be selected by default for the OLA appointment even if there is an

existing card.

Payment Cards				
Account Payer	Card Type	Card Number	Expiry	Valid
Gilmour, David	MONSTERC...	XXXX XXXX XXXX 9876	06/27	✓

The patients' workflow

Patients can be prompted to provide credit card information when reception sends an SMS request or when making an Online Appointment. In both cases, a secure token for the card will be sent to Zedmed. This token does not contain the credit card information. Zedmed uses the token to integrate with Tryo, which manages the payment transfers.

For Online Appointments

- See the [OLA booking with PG guide](#).

For SMS card requests

- The patient receives an SMS with the text 'Please add credit card details for <name of branch> and a URL.
- Tap the URL to open the online credit card information screen.

Your credit card is required to secure your appointment

Here's your upcoming appointment details Emma Black

Dr Phillip Davis
Std Consultation

Add new card:

Card Holder Name: CARD HOLDER

Card Number:

Expiry Date: MM YY ...

Security Code (CVV):

To verify your card details, a AU\$1 temporary authorisation charge will be placed on your card. This is temporary and will be removed from your statement.

Add Payment Method

- Enter their credit card information.
- Tap **Add Payment Information**.

A confirmation message will display.

This link cannot be used again.

Once the card is verified, Tyro will send Zedmed a secure token, and the patient's appointment will display a credit card icon.

Banking reconciliations

Payments received using the Payment Gateway will show as **ePayments** in Zedmed's banking reports.

To assist with resolving any issues, you can log in to the Tyro Portal and review Tyro's Payment Report. The next release of Zedmed v39 will include a Tyro Reconciliation report.
