

Heidi AI Webnair

Version: 1.00 | Last Modified on 12/05/2025 9:55 am AEST

Zedmed's Heidi AI integration uses voice input to generate AI-enhanced clinical notes and consultation transcripts. All generated content can be reviewed and manually edited before it is added to a patient's file. Requires Zedmed v38.

To learn more, see our Heidi [user guide](#) and [FAQ](#).

This is a recording of the public Heidi AI webinar presented on 8 May 2025.
