

Gender Identity options

Version: 1.00 | Last Modified on 21/11/2025 2:40 pm AEDT

Record a patient's gender identity in Office (Patient Details) and Clinical (Patient demographics). Sexuality is still available in Clinical under Family, Social & Past History. A (data toolbar) merge field for Gender Identity has been added to letters and templates in Office and Clinical.

The left screenshot shows the 'Patient Details' form for 'Jones, Marrianna-Louise'. The 'Gender Identity' dropdown menu is open, showing options: Male, Female, Non-Binary, Gender diverse, Transgender, and Prefer not to say. The 'Pronouns' dropdown is also open, showing the same options. The 'Sex at Birth' is set to 'F' and 'Age' is 58.

The right screenshot shows the 'Patient Details' form for 'Holloway, Mr Knut'. The 'Gender Identity' dropdown menu is open, showing the same options. The 'Pronouns' dropdown is also open, showing the same options. The 'Sex at Birth' is set to 'M' and 'Age' is 19/05/1995.

Additional identities can be added via **drop-down list management**:

1. Select **Practice Setup > Drop-Down List Management**.
2. Select **Gender Identity**.
3. Select **Add Value**.
4. Fill in the required fields, then click **Close** to save.

The 'Drop-Down List Management' window is shown with the 'Gender Identity' section selected. The table lists the following values:

Description	Active	&	MED	BR3	BR4
Male	☒	☒	☒	☒	☒
Female	☒	☒	☒	☒	☒
Non-Binary	☒	☒	☒	☒	☒
Gender diverse	☒	☒	☒	☒	☒
Transgender	☒	☒	☒	☒	☒
Prefer not to say	☒	☒	☒	☒	☒

At the bottom of the window, there is an 'Add Value' button (highlighted with a red box), a 'Delete Value' button, a 'Close' button, and a 'Cancel' button.
