

Zedmed v38.8.8

Version: 1.00 | Last Modified on 06/02/2026 12:55 pm AEDT

6 February 2026 | This release includes one update for OIDC.

SSO	ZED-11009	<p>Clear subject OIDC option added</p> <p>Added a Clear OIDC Subject button to the Staff Member dialogue to allow SSO credentials for a user to be reset. The button is on the Staff tab in Zedmed Security Roles and Users, and is only visible to Zedmed Support.</p>
-----	-----------	--

Zedmed v38.8.6

19 January 2026 | This release includes two updates for Single Sign-on.

SSO	ZED-11001	<p>Added OIDC support</p> <p>Zedmed now supports Single Sign-On using OIDC provided by Cognito.</p>
SSO	ZED-11001	<p>Allow single login access to Zedmed Cloud</p> <p>Office to load access and refresh tokens from environment variables. Practitioners are still required to re-enter their credentials when prescribing S8 drugs</p>

Zedmed v38.8.3

1 December 2025 | This release includes one update.

Clinical	ZED-10984	<p>Added a configuration option to the image capture folder.</p> <p>The Canon Capture folder can now be extended to include a user-defined subfolder - ie different for each Doctor. Folder configuration has been added to Clinical My Options > General > Override image capture folder. In ZedCloud, the folder name specified will be appended to the %USERPROFILE%\My Files\Home Folder</p>
----------	-----------	---

Zedmed v38.8.2

27 November 2025 | This release includes three updates.

Office	ZED-10977	<p>New appointment types are not being added to existing appointment activity types</p> <p>Newly created Appointment Types will now be automatically assigned to all Appointment Activity Types in the system.</p>
Clinical	ZED-10976	<p>Letter writer throws an error that cant be cleared if adding a CC Doctor</p> <p>Fixed error that was displayed when editing a letter and adding Cc addressees via the document properties.</p>

Clinical	ZED-10978	Scanned Images with Multiple Pages - Cannot See All Pages of Scanned Documents Fixed issue that prevented scrolling between images when opening a multi-page image in the viewer.
----------	-----------	---

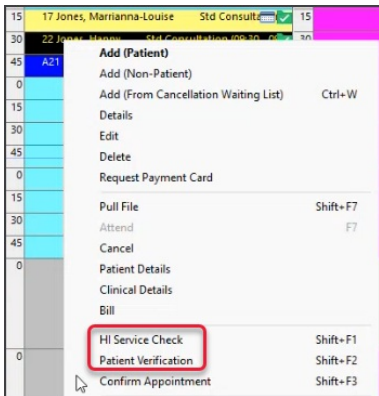

Zedmed v38.8.1

21 November 2025 | This release includes 10 new features and 15 enhancements.

NEW Appointment Grid right-click options

You can now right-click an appointment to access **IHI Service Check** and **Patient Verification**.

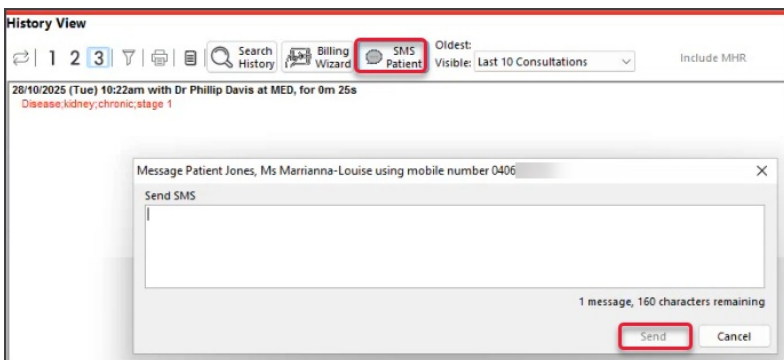

- **Patient Verification** will include an **Update Details** button.
- **HI Service Check** will confirm the IHI number or display a message if the check fails.

NEW SMS patient from Clinical

Practitioners can now send an SMS to a patient from Clinical using the new **SMS Patient** button on the History toolbar.

- The button is disabled if the patient does not have a mobile phone number.
- A pop-up dialog will confirm if the SMS was successfully sent.
- Requires the 'Send Clinical SMS' permission, which practitioners should already have.
- Shows in Message Manager - the **Category** is **Clinical Direct**.

NEW SMS Account Due reminder

You can now send SMS reminders to payers with due accounts (as per the **Debtors Report**) using the **Account Reminders** report. The SMS can be sent to payers of the **Private Payer** Type, not for Third Party payers.

The message sent is: 'Your account is now due. Please contact <Branch> on <phone number> to pay.'

Or if an aging period is selected: 'Your account is <X> days overdue. Please contact <Branch> on <phone number> to pay.'

Message Details
Your account is 60 days overdue. Please contact Branch 1 on 03 9284 3300 to pay

To run the report:

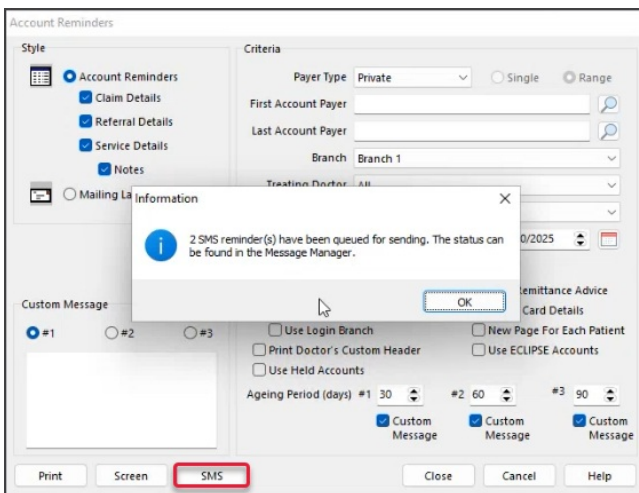

1. From the **Management** tab, select **Debtors > Account Reminders**.
2. Review the selections.

For example, the **Accrue Date** can be set to end 30 days ago to exclude invoices raised in the last 30 days.

See the **Debtors Report** guide for explanations of the filters.

3. Select **Screen** to display and review the intended recipients.
4. Select **SMS**.

A pop-up will confirm how many reminders were sent.

New ePayment Status report

This report identifies patients without a payment card on file (for **ePayments**) and sends an SMS to those patients **requesting payment card information**. The report can be filtered and run for patients with appointments in the coming week.

To send a payment card request to patients who do not have a card on file:

1. From the **Management** tab, select **Reports > ePayment Status Report**.
2. Select **Has Credit Card - No**.
3. Select **Has Mobile Number - Yes**.
4. Review and apply any filters.

For example, you will want to select an age range that excludes children. You can also apply a filter to only include patients with an appointment in the next week or month.

5. Select **Screen** to review the patients who will receive the SMS.
6. Select **Request Payment Card**.

New Cancellation buffer for Online Appointments

You can now set a time buffer (in hours) within which the patient cannot cancel or change an **Online Appointment**. If they try, a message will advise that the appointment cannot be altered.

To enable this feature:

1. Select **Practice setup > Branches**.
2. Select the **Online Appointment Details** button.
3. Set the number of hours for the **Cancellation buffer (hours)** in Office, for example, '2'.
4. **Close** to save.

Public Holidays:	<input type="text"/>	<input type="text"/>

New Appointment Confirmation

You can now manually confirm an appointment from the **Appointment Grid**. This is ideal for patients who cannot respond to 2-way SMS.

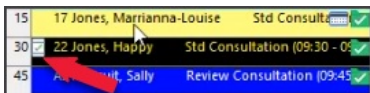

The confirmation date and time are displayed in the Appointment Details (screenshot below).

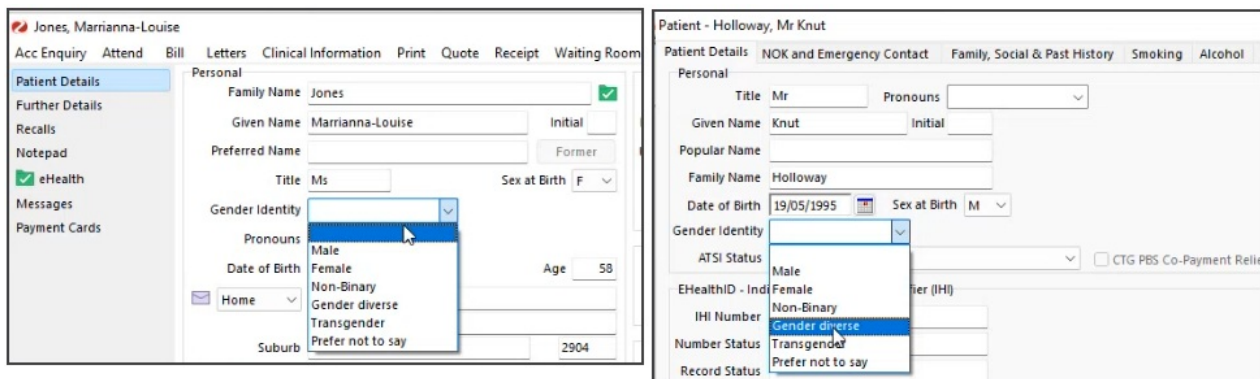

An icon can be used to show when an appointment is confirmed.

This icon is enabled in the Appointment Grid's menu: select **View > Options**, then tick the **Show SMS Response** box.

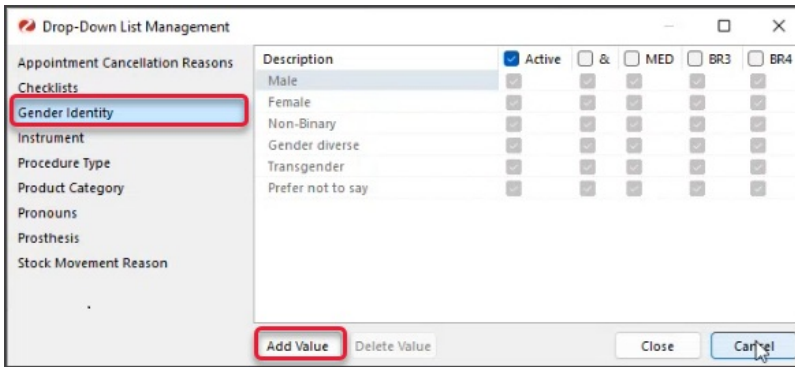

New Gender Identity options

Record a patient's gender identity in Office (Patient Details) and Clinical (Patient demographics). Sexuality is still available in Clinical under Family, Social & Past History. A (data toolbar) merge field for Gender Identity has been added to letters and templates in Office and Clinical.

Additional identities can be added via **drop-down list management**:

1. Select **Practice Setup > Drop-Down List Management**.
2. Select **Gender Identity**.
3. Select **Add Value**.
4. Fill in the required fields, then click **Close** to save.

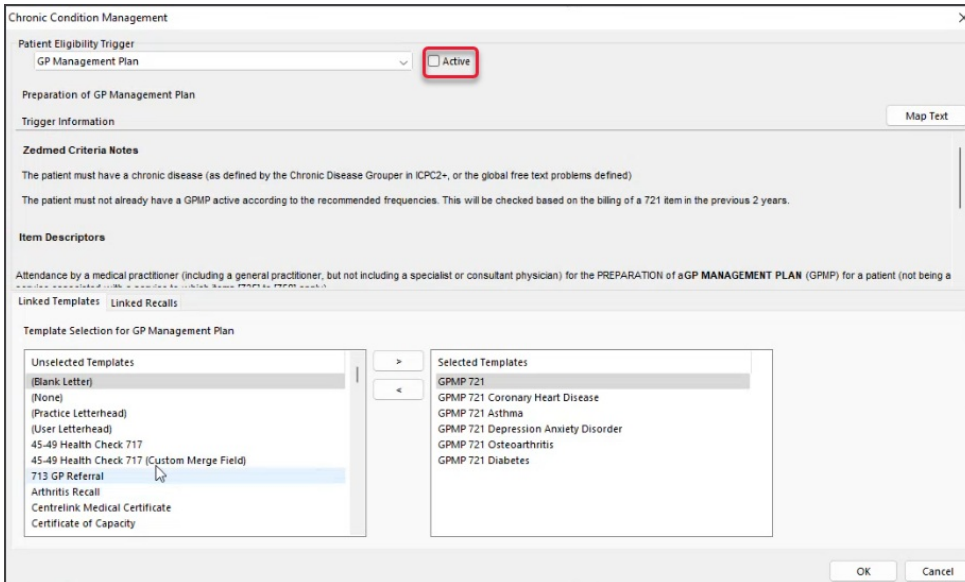

Updated Chronic Condition Management (CCM) module

Chronic Disease Management has had a visual refresh and been renamed to Chronic Condition Management (CCM).

The updated CCM module is opened from Clinical under **Tools > Clinical Setup > Chronic Condition Management**.

The **Patient Eligibility Trigger** now includes a checkbox that lets you set the selected plan to **Active** or **Inactive**.

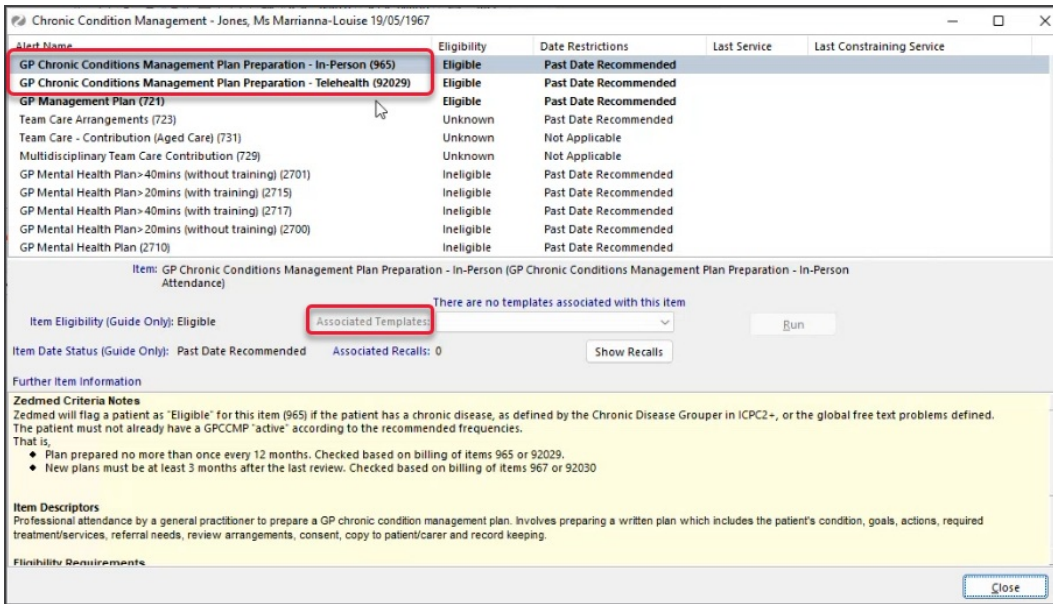

Due to **recent changes to the MBS framework**, new plans were added to the CCM module:

- GP Chronic Condition Management Plan preparation GPCCMP, items 965 and 92029.
- GP Chronic Condition Management Plan review GPCCMP, items 967 and 92030.

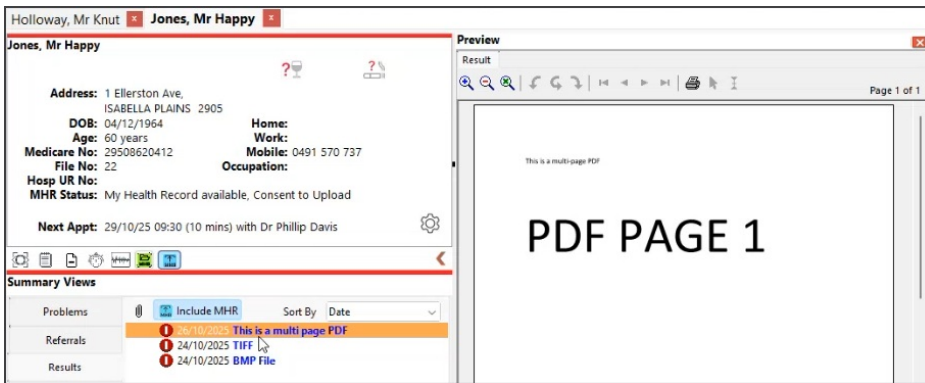

You can **download the new templates** from Zedmed's Customer Portal and associate them with the applicable plan.

The text in the yellow section (screenshot below) has been updated, and specific \$ values have been removed.

NEW Preview Pane for Results, Incoming documents and ECG/Images

Summary Views for Results, Incoming documents and ECG/Images now support previews for the following file types: TIFF, JPG, JPEG, PNG, BMP, PDF, RTF, DOCx and TXT.

NEW AIR Antenatal updates

Antenatal is no longer a vaccine type, so a new **Antenatal** indicator checkbox has been added to the **Immunisation** screen. If the patient has an open pregnancy record and you add an immunisation, the box will be ticked and transmitted to the AIR. The practitioner can also manually select it.

This is required by Medicare when transmitting a claim for an immunisation and applies to female patients aged 10 to 65 inclusive who are pregnant at the time of the immunisation for immunisations given after 01/03/2025.

Enhancements

Office	ZED-10400	<p>Users with 'Patient Details' access can use the 'Request Payment Card' button on the Payment Card tab. Changed the security permissions on the Request Payment Card button so it no longer enforces the PaymentCards_Edit permission. Users who can view Patient Details can now use this function. They are still unable to delete cards.</p> <table border="1"> <thead> <tr> <th>Card Type</th> <th>Card Number</th> <th>Expiry</th> <th>Valid</th> </tr> </thead> <tbody> <tr> <td>MASTERCARD</td> <td>XXXX XXXX XXXX 0008</td> <td>01/39</td> <td>✓</td> </tr> </tbody> </table> <p>Request Payment Card Remove</p> <p>Delete Print Patient Verification Find Close Cancel</p>	Card Type	Card Number	Expiry	Valid	MASTERCARD	XXXX XXXX XXXX 0008	01/39	✓
Card Type	Card Number	Expiry	Valid							
MASTERCARD	XXXX XXXX XXXX 0008	01/39	✓							

Office	ZED-10620	<p>Reception can override the Appointment Types shown for the Activity Type</p> <p>Added an 'Include all appointment types' option to the Appointment Details dialog so users can now choose to include all Appointment Types when booking an appointment. This enhances the recent update that allows practices to determine which Appointment Types are selectable for an Activity Type.</p> 
Office	ZED-10482	<p>Theatre lists (Surgical Procedures lists) now include additional claim and referral information.</p> <p>The list now includes: Insurer name, Claim number and Referral details.</p>
Office	ZED-10487	<p>Schedules are now listed in consistent date order</p> <p>Schedules, as shown in Practice setup > Appointments > Schedule - Schedules, are now listed with Active schedules at the top, then by Start Date and End Date.</p>
Office	ZED-10527	<p>Allow users to perform their own Doctor's App setup</p> <p>Added a new security role, 'Doctors App Setup', that allows doctors (users) with this role to set up the Doctor's App (generate a QR code) without assistance from Zedmed Technical Support.</p> <ul style="list-style-type: none"> • This gives the doctor read access to the Security module and full access to their own App Access tab. • The PM will need to add the role to doctors created before this update. • The doctor will need to follow the steps in the Doctors App setup guide (Installing section). 
Office	ZED-10555	<p>Search for end-dated items in Item Details</p> <p>The Item Details search has been enhanced to locate an item without an end date, or if absent, the entry with the latest end date.</p>
Office	ZED-10589	<p>Enhancements to the referral doctor selector</p> <p>Referral Doctor Selector in Office is now larger by default and can be resized. The error message when cancelling the creation of a new Referral has also been improved.</p>

Office	ZED-10599	<p>Improve the Eclipse Doctor Fund Interface</p> <p>The Doctor Fund Details dialogue now lists all the funds set up in Zedmed and lets you enable the funds required. This replaces the existing screen that has a separate edit dialog for each fund.</p> <p>To add a fund:</p> <ol style="list-style-type: none"> 1. Tick to make it Active. 2. Use the Claim Type arrow to choose Agreements or Schemes. 3. Enter the Fund Payer Id. 4. Save when finished. 
Office	ZED-10610	<p>Removed unused fields from the Branch Options form.</p> <p>Remove "MA online Overwrite Location" from Branch options, as it is no longer used.</p>
Clinical	ZED-10514	<p>Create a clear cache function for Heidi AI</p> <p>Added a function to clear the Heidi AI scribe cache to the Tools > My Options form. This helps users who have chosen not to allow microphone access. The microphone option will be prompted again after a 15-second Heidi refresh. It will also help with an issue where Heidi will not load due to a corrupted cache.</p> 
Clinical	ZED-10537	<p>Add Close The Gap PBS Co-Payment to electronic prescribing</p> <p>When ePrescribing, the confirmation now displays a 'CTG PBS Co-Payment' box, which will be selected if the Patient is eligible for the "Close The Gap" PBS Co-Payment Relief.</p> <p>CTG is set up in Patient Details (Office) and Patient Demographics (Clinical). It cannot be ticked during the prescribing process.</p> 
Clinical	ZED-10542	<p>Send results to the patient as a PDF</p> <p>When sending Results using Secure Send, those in Rich Text Format are now converted to PDF format so the recipient(s) receive a read-only PDF document. PDFs are harder to edit manually.</p>

Clinical	ZED-10547	Secure Send does not need to include a patient and recipient email addresses load automatically. Secure Send for 'referral letters' in Clinical now automatically loads letter recipients with email addresses. Secure Send can also be used to send a 'referral letter' without including a patient as the recipient.
Clinical	ZED-10574	Add Radiology Template FAST Report - Transparent Medical Imaging Added the Transparent Medical Imaging template to the list of available radiology templates in clinical.
OLA	ZED-10318	Updated the OLA message when an appointment cannot be cancelled The message "Your appointment could not be cancelled. Please contact the branch on [Phone Number] to cancel your appointment." is now displayed in OLA when a patient attempts to cancel or reschedule an appointment within the practice's cancellation buffer.

Fixes

Office	ZED-10934	Resolved 'Earliest date of service error' when performing a Patient Verification in the Appointment Grid. This error applies to future appointments and has been resolved in Zedmed v38.8.1 as follows: if the date of the appointment is in the future, then send the current date as the service date for patient verification
Office	ZED-10506	Appointment - Credit card icon not appearing in Appointment Grid Patients with payment cards expiring in the current year will now have the icon displayed in the appointment grid and attendance details screens. Previously, the icon would only display for cards expiring in future years.
Office	ZED-10461	3rd Party Batching - Change in Format does not show all the numbers/characters of the item code Expanded the Item code field on the Third Party Batch report to prevent cutting off long item codes.
Office	ZED-10587	My Medicare information is not displayed on the Marketing report unless the filter is selected Fixed Zedmed marketing tool to display the patient's My Medicare data if selected, even when the user has not specified it in the filter criteria.
Office	ZED-10602	Claim Screen Only Loading 50 Claims Fix loading of records after the first 50 in the claim status screen.
Clinical	ZED-10284	Changes to the preview pane The preview pane will now close when another summary views tab is selected and will no longer open temporarily while a patient record is loading.
Clinical	ZED-10460	PIT files are created in the wrong Healthlink folder when ESend Method is set to Default An issue has been resolved where Zedmed Clinical failed to copy PIT format documents to the "PIT_OUT" subfolder when HealthLink was set as the default transport provider in Global Options, and the address book entry specified "Default" ESend Method.
Clinical	ZED-10576	>2 Does not work in problem creation Fix the display of problems containing < or > symbols in the summary view.

Clinical	ZED-10641	Exception attaching encounter notes with an addendum to a Healthlink form Fixed the issue that causes an exception error to be displayed when attaching encounter notes with an addendum to a Healthlink form.
Clinical	ZED-10634	PDF Viewer not showing PDF correctly Upgraded the PDF viewer used for viewing results and incoming documents in clinical.
Clinical	ZED-10929	Immunisation records created before v38.8.0 are not transmitting to AIR Zedmed v38.8.1 fixes an issue preventing the sending of immunisations created before the upgrade to 38.8.0 to AIR.

Updates for the new features

Office	ZED-9513	Manual Send SMS from Account Reminder report The Account Reminders report now allows users to send overdue reminders using SMS.
Office	ZED-9514	New SMS type (Account Reminder) in the Message Centre The message manager now allows users to filter SMS messages in the "Account Reminder" category.
Office	ZED-10153	Add SMS reminder function to the patient ePayment status report The Request Payment Card button on the ePayment Status report now allows users to send an SMS containing the ePayment details capture link to multiple patients at once.
Office	ZED-10271	Allow filtering by SMS transmission status The ePayment status report allows filtering based on the payment link SMS message status.
Office	ZED-10139	Build a credit card status report using patient fields for selection New ePayment Status Report added to Management > Reports to report on patients' ePayment status.
Office	ZED-10241	Add a cancellation buffer field in Online Appointments details Added a new "Cancellation buffer (hours)" option in Branch Online Appointment Details for Online Appointments. This allows a branch/clinic to set the number of hours before an appointment can be cancelled online.
Office	ZED-10616	Add confirmation information to the appointment details when confirmed by a staff member For appointments confirmed by a member of the practice staff, the appointment details dialog now displays the confirmation time and staff member's name.
Office	ZED-10456	Add Hi Service Check to Appointment Grid Users can now perform a patient IHI search from the context menu (right-click) in the Appointment Grid.

Office	ZED-10457	<p>Add Patient Verification to Appointment Grid</p> <p>Users can now perform an online patient verification from within the appointment grid. This workflow uses the doctor and clinic associated with the appointment.</p>
Office	ZED-10458	<p>Add Confirm Appointment to Appointment Grid</p> <p>Staff can confirm an appointment on behalf of the patient. This feature requires the Show SMS response option to be enabled so that an icon is displayed when the appointment is confirmed.</p>
Office	ZED-10601	<p>Enable Qty field in Billing to have decimals</p> <p>Added an Allow Decimal option in Item Details so that quantity items can now be marked as accepting decimal quantities when billing. This is useful for NDIS practitioners who need to record the number of hours when billing for a 'quantity item', they could put in 0.75 hrs to bill 0.75 of the value.</p>
Office	ZED-10477	<p>Add Gender Identity to Patient Details in Office</p> <p>In Office a patient can now be assigned their chosen Gender Identity in the Patient Details screen.</p>
Office	ZED-10477	<p>Added a Gender Identity to the drop-down list management</p> <p>Gender Identity values can be managed in the Dropdown List Management in Office.</p>
Office	ZED-10483	<p>Add Gender Identity to the Marketing Report</p> <p>The marketing report now includes Gender Identities for filtering the patient search.</p>
Office	ZED-10485	<p>Add Gender Identity to a merge field for letters and templates in Office</p> <p>New merge fields for Gender Identity and Sex at Birth have been added to the Office Template Editor for relevant templates.</p>
Office	ZED-10486	<p>Add Gender Identity to the patient merge</p> <p>Patient Merge has been updated to include the patient's Gender Identity.</p>
Clinical	ZED-10478	<p>Add Gender Identity to Patient Details in Clinical</p> <p>Patient Demographics/Details in clinical now includes a Gender Identity dropdown to record the patient's chosen identity.</p>
Clinical	ZED-10484	<p>Add Gender Identity to a merge field for letters and templates in Clinical</p> <p>A Merge field for Gender Identity is now available in Clinical Templates.</p>
Clinical	ZED-10772	<p>Add SMS messages sent from Clinical to the Message Manager</p> <p>Added category "Clinical Direct" to the message manager to allow users to filter SMS messages sent using the new SMS Patient option in Clinical.</p>
Clinical	ZED-10282	<p>Add .docx and .txt to Document preview</p> <p>Two new file types, Docx and Txt, have been added to the Document Preview feature for the Documents Summary Tab.</p>

Clinical	ZED-10283	<p>Add a preview pane for Results in clinical</p> <p>Patient Results and Incoming documents can now be previewed from the Patient's record in clinical. Supported file types are: docx, pdf, txt, bmp, jpg, jpeg, png, tif and tiff.</p>
Clinical	ZED-10285	<p>Add a preview pane for Images/ECG in Clinical</p> <p>In Clinical Patient Record, the entries in the Summary Views ECG/Images can now be previewed. Supported file types are: docx, pdf, txt, bmp, jpg, jpeg, png, tif and tiff.</p>
Clinical	ZED-10522	<p>Move the Chronic Disease Management Module to a new location</p> <p>The Chronic Disease Management module has been renamed Chronic Condition Management. The configuration UI has moved from Clinical Global Options to Clinical main menu under "Tools > Clinical Setup".</p>
Clinical	ZED-10577	<p>Add the ability to set Patient Eligibility to Inactive</p> <p>Users can now deactivate patient eligibility triggers in the Chronic Condition Management module.</p>
Clinical	ZED-10578	<p>Add new CCM Triggers</p> <p>New plans added to the Chronic Condition Management module:</p> <ul style="list-style-type: none"> • GP Chronic Condition Management Plan preparation GPCCMP, items 965 and 92029. • GP Chronic Condition Management Plan review GPCCMP, items 967 and 92030.
Clinical	ZED-10629	<p>Message patient from clinical</p> <p>Added an SMS Patient button next to the Billing Wizard button, giving Doctors the ability to send an SMS to a patient from the currently opened Patient Record. The button will be disabled if the patient does not have a mobile phone number recorded.</p>
Clinical	ZED-10634	<p>PDF Viewer not showing PDF correctly</p> <p>Upgraded the PDF viewer used for viewing results and incoming documents in clinical.</p>
Clinical	ZED-10695	<p>Further UI updates to the Chronic Condition Management module</p> <p>UI updates were made to improve navigation and make information display more readable.</p>
Clinical	ZED-10241	<p>Add a cancellation buffer field in Online Appointment details</p> <p>Added a new "Cancellation buffer (hours)" option in Branch Online Appointment Details for Online Appointments. This allows a branch/clinic to set the number of hours before an appointment can be cancelled online.</p>
Clinical	ZED-10780	<p>AIR Antenatal updates</p> <p>A new Antenatal Indicator checkbox has been added to the Add Immunisation form. This is required by Medicare when transmitting a claim for an immunisation and applies to female patients aged 10 to 65 inclusive who are pregnant at the time of the immunisation for immunisations given after 01/03/2025. The checkbox is automatically populated according to these requirements or can be manually selected by the practitioner. Antenatal option has been removed from the Vaccine Type.</p>

Clinical	ZED-10939	Immunisation Route checkboxes become unticked when modifying or ticking the new antenatal option. Fixed an issue where the immunisation route options were incorrectly updated by changes to the new Antenatal.
----------	-----------	---

Zedmed v38.7.6

24 October 2025 | This release includes critical updates to support the November Medicare Fee Changes.

Bulk Billing incentives

From 1 November 2025, the eligibility for MBS bulk billing incentives will be expanded to all Medicare-eligible patients. This scheme will be available to participating practices that bulk bill every eligible service for every Medicare-eligible patient.

This change removes the age restriction and concession card requirements for the incentive items: 10990, 10991, 10992, 75855, 75856, 75857, 75858, 75870, 75871, 75872, 75873, 75874, 75875, 75876, 75880, 75881, 75882, 75883, 75884 and 75885.

To learn more, see the [MBS Online Information PDF](#).

Zedmed v38.7.4

Office	ZED-10747	Unable to view details or edit referral - qryReferral Dataset not in edit or insert mode Fixed an error that occurred when opening a referral's details in Office.
--------	-----------	--

Zedmed v38.7.3

Office	ZED	In App Messaging is turned off by default. This feature is disabled by default and not recommended for Zedmed Cloud or practices running Zedmed on-prem via Terminal Servers. To enable this feature, select Practice Setup > Practice - tick Show Zedmed Notifications .
--------	-----	---

Zedmed v38.7.2

NEW Appointment Grid UI enhancements

The following improvements have been made to the Appointment Grid:

- Appointments that span multiple slots are now shown as a single block with the patient name at the top.
- Appointment Details has an editable start time field, which does not need to align with the slot's start time.
- Appointments can be booked outside of a practitioner's scheduled time (grey area of Appointment Book).
- An Activity Type's name can now be displayed in the earliest free spot in a block of scheduled time. This option is enabled under Appointment Book: View > Options > 'Show activity type description at top of schedule'.

NEW Track patient referral session count.

Zedmed can now display how many sessions a referral is for and how many have been used. The total number is added manually, and each time the patient is billed using that referral, the number used increases by 1. For example, a patient who is entitled to 3 visits on a

referral would show 2/3 after being billed for 2 sessions. Refer to the [Referrals guide](#) to learn more.

Enable referral session count.

To enable the feature, select Practice Setup > Practice > 'Track count of Patient Referral Sessions' - then reopen Office.

Configuring the referral session count

When a patient has a referral for a number of sessions, type that number into the Session Count field in the Patient Record's Referral Details.

For Referrals added before enabling this feature, the session count will be 0/0.

Session count considerations

- Voiding an invoice will decrease the count.
- If your practice invoices cancellations, deselect the referral from the invoice.
- The used sessions count can grow greater than the number of sessions the referral is for.
- The referral session count increases each time the patient is billed, so the referral must be linked to the invoice when billing.

Where the session count is displayed

- Office: Patient Details - Referrals (referral Details).
- Office: Appointment Details.
- Clinical: Patient Demographics (by referrer name) - For Specialist sites only (Site Type > Specialist under Global Options).

NEW Link Appointment Types and Activity Types

Currently, a practitioner's scheduled time is assigned a colour-coded Activity Type in the Appointment Book to let reception know what the practitioner is doing during that time.

This new release allows the practice to assign specific Appointment Types to an Activity Type, so only those Appointment Types are selectable when a booking is made. This helps manage what Appointment Types are available to reception staff in Zedmed and to patients using OLA.

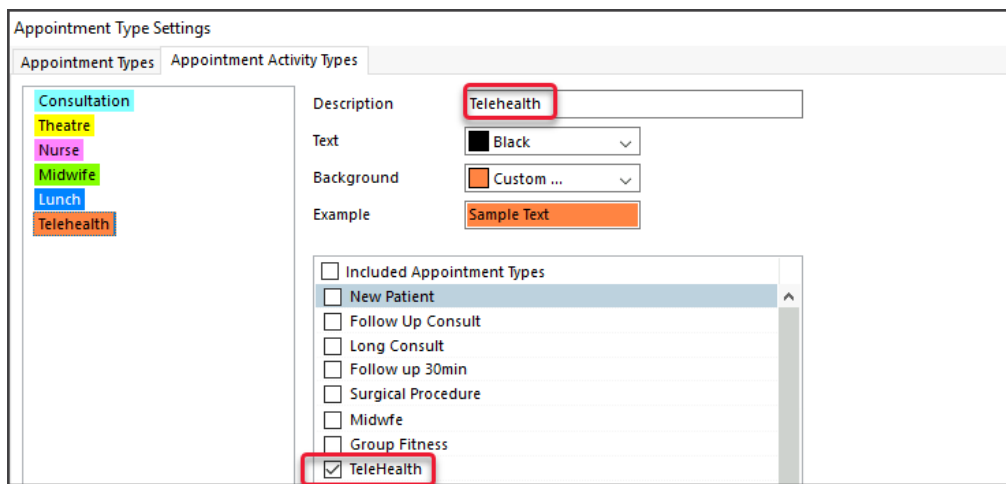

For example, a GP's schedule is divided up into two Activity Types, Consultations and Telehealth. The Activity Type 'Consultations' only allows Short, Long and New patient Appointments Types - they are the only three options available when making a booking. Time scheduled with the Activity Type 'Telehealth' only gives the option to select a Telehealth appointment.

Activity Types and Appointment Types are now tabs in the new Appointment Type Settings screen. New and current Activity Types have all Appointment Types selected by default. New Appointment Types need to be added to an Activity Type.

See the [Manage Appointments and Activities](#) guide to learn more.

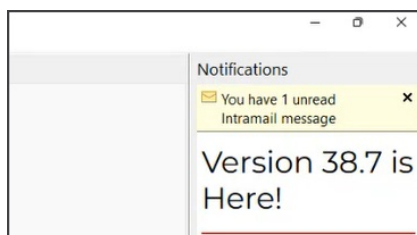

To configure Appointments and Activities:

1. Select **Practice Setup > Appointments > Appointment Type Settings**.
2. Select the **Activity Type** from the left.
3. Tick/Untick the **Appointment Types** to be available for that Activity.
4. Optional - Review the Activity Types used in each **practitioner's schedule**.

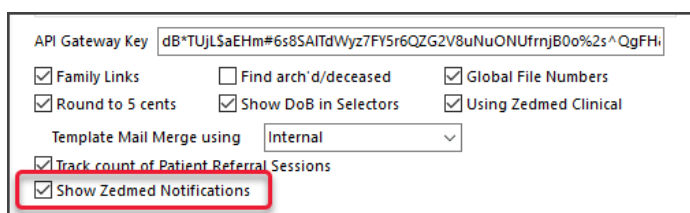

NEW Live messaging

Zedmed can display live updates in Office to advise customers of time-sensitive issues like outages and software updates. These messages are displayed in the Office Notifications panel (screenshot below) and in a notification bar at the bottom of the Appointment Grid.

This feature is disabled by default and not recommended for Zedmed Cloud or practices running Zedmed on-prem via Terminal Servers.

To enable this feature, select **Practice Setup > Practice** - tick **Show Zedmed Notifications**.

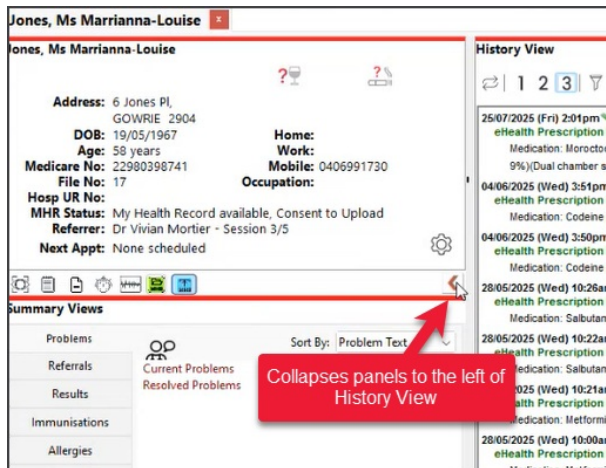

NEW Custom clinical layout

You can now hide the left panels to free up space for features like Heidi and Telehealth and have the History and current Encounter side by side. The Clinical menu items and Summary view tabs displayed can also be modified to remove features that are not used. To learn more, see the [Customising Clinical's layout](#) guide.

Hide left side panels (Summary Views, Demographics, Reference)

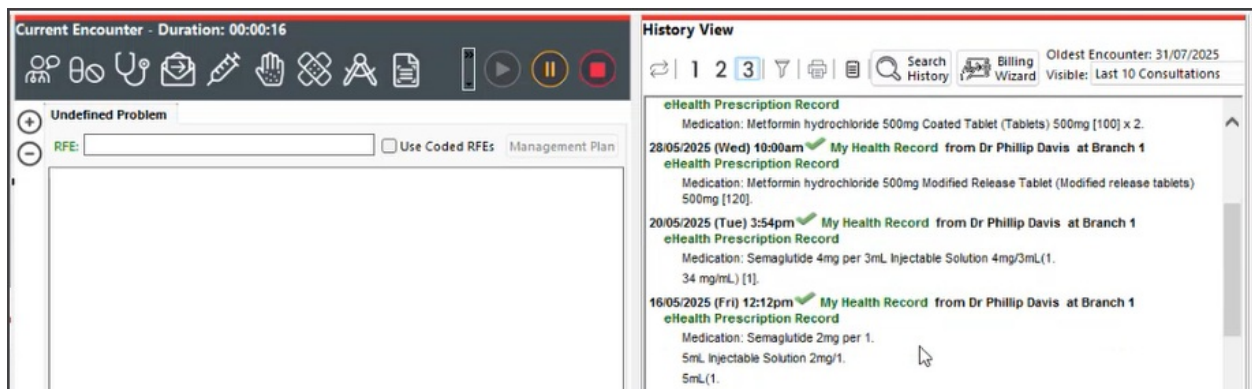

Click the chevron to collapse the panes to the left of History View. This provides more room for Zedmed's Telehealth and Heidi AI. The chevron icon moves to the left of the screen and can be clicked to reopen the panels (mouseover to preview Summary Views).

History and Current Encounter - side by side

Each practitioner can now switch between History View and Current Encounter as a 'side-by-side' display or 'top-bottom'.

Enable this option under Clinical > My Options > 'Patient History and Encounter'.

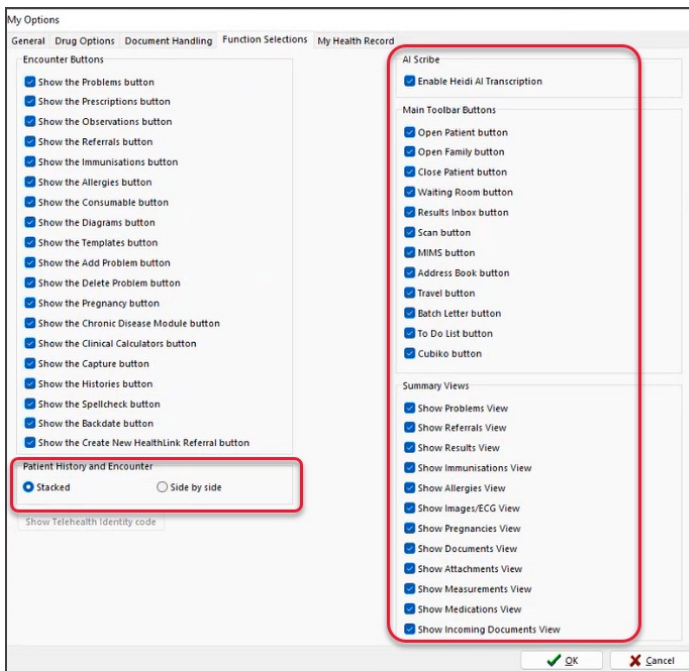

Show or hide selected Clinical buttons and Summary Views tabs

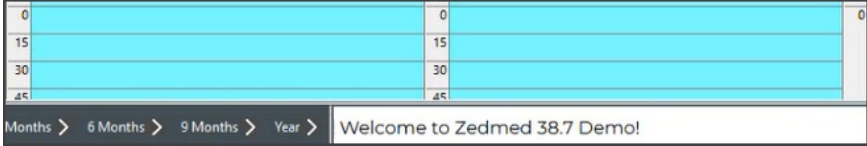

Each practitioner can now hide specific Clinical Menu buttons and Summary Views tabs.

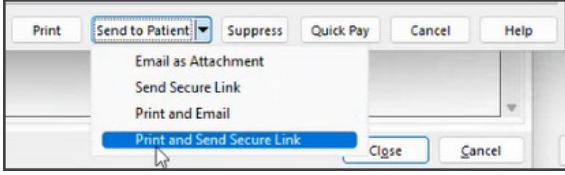

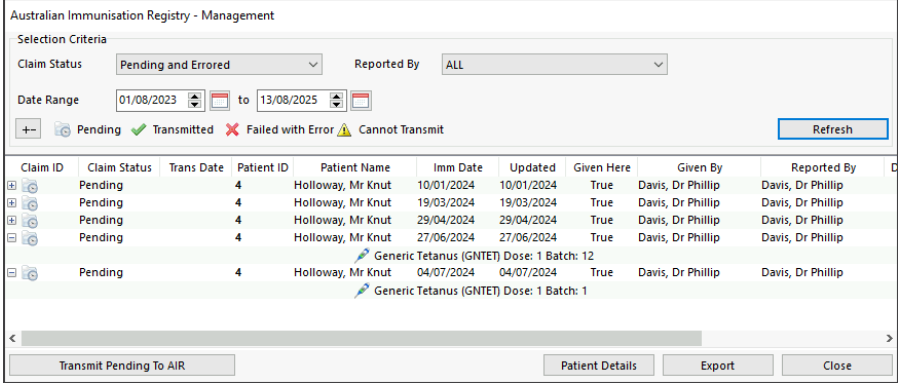

Enable these options under Clinical > My Options > Function Selects tab.

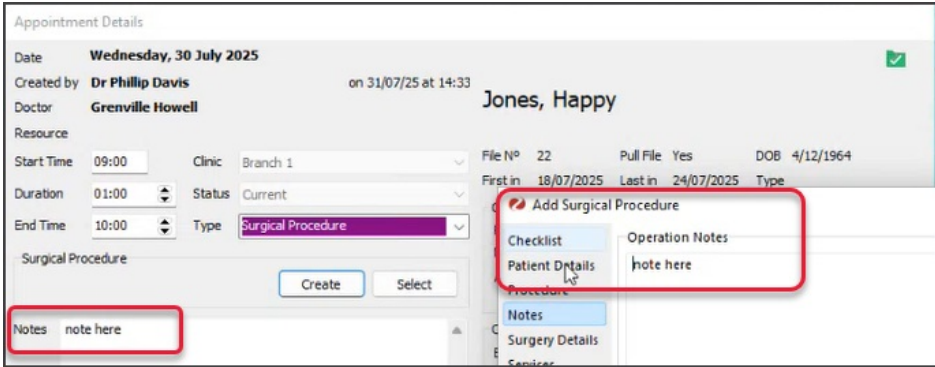

Previously, you could only hide modules in the Current Encounter menu.

Enhancements

General		
Office	ZED-10227	Zedmed's Patient report now lets you choose the save location Allow the user to select a save location for the CSV export of patient report data.
Office	ZED-10270	Add an embedded web page to Office. Zedmed Office can now display live updates in the notification panel.
Office	ZED-10280	Add an embedded web page to the Appointment grid Zedmed Office can now display live updates in the Appointments screen. 
Office	ZED-10321	Add an export button to 3rd Party Batching An Export to CSV option has been added to the Third Party Batch Enquiry form.
Office	ZED-10373	Add the Service date as a filter in the Debtors Report. The selection criteria for invoices on the Debtors Report now include the option to filter by Service Date.
Office	ZED-10379	Added all 100 private fee values to the Item Report CSV export dataset Previously, when running the Item details report only codes in the Fee 1-10 Tab were displayed.

Office	ZED-10380	<p>Added a print and email option for invoicing. Added an option to both Print and Email or Print and Secure Send an invoice or receipt during the invoice/quick pay process. This menu is also available in Account Enquiry and QuickPay screen.</p> 
Office	ZED-10396	<p>Improve the admission time picker usability Replaced the Admission time selector (in Surgical Procedures module) with one that can be typed in and change all times to 24-hour.</p>
Office	ZED-10423	<p>AIR Immunisation Loading time optimisation The time taken to load immunisation data is now faster. A progress dialogue is displayed as data is loaded, and a cancel button has been added to stop the loading. When changing any of the selection criteria, the user must now click the Refresh button to display the new data. This allows multiple changes to be made without the data refreshing after each change.</p> 
Office	ZED-10563	<p>Improved Patient Merger performance The merging of payment card data within the Patient Merger module has been made significantly faster.</p>
Clinical	ZED-10357	<p>If a MIMS drug is discontinued, you can now search for an alternative Allow a doctor to search for a new drug to prescribe in the event they attempt to re-prescribe a drug that no longer exists (with the exact ID) in MIMS.</p>
Appointments & Activities		
Office	ZED-10291	<p>Update Activity and Appointment screens The Appointment Type and Activity Type screens are now combined into Appointment Type Settings.</p>
Office	ZED-10292	<p>Link Appointment Types to Activity Types When booking an appointment, Zedmed now restricts appointment types according to the slot's activity type. This provides better control over what appointment types can be scheduled for each activity type.</p>

Office	ZED-10294	<p>Show the Activity Type's name at the top of the appointment block</p> <p>The Appointment Grid can now display a slot's Activity Type name in the first blank scheduled slot.</p>
Office	ZED-10295	<p>Single Appointment block over multiple slots</p> <p>Appointments that span multiple slots are now shown as a single block with the patient name at the top.</p>
Office	ZED-10397	<p>Appointment notes are included in Surgical Notes when adding a surgical procedure</p> <p>Surgical procedure notes now start with the notes from the appointment when creating a procedure from an appointment.</p> 
Office	ZED-10398	<p>When billing from the Appointment Grid, the invoice date defaults to the appointment's date</p> <p>Billing past appointments <u>from the Appointments screen</u> will now use the booking date as the attendance and service day instead of the current date.</p>
Office	ZED-10399	<p>You can now edit the appointment time when creating an appointment</p> <p>Users can now create appointments with custom start times, allowing flexibility for bookings that don't need to begin at the exact start of a schedule slot or occupy its full duration.</p>
Referral letters		
Office	ZED-10442	<p>When creating/editing a referral, capture the total number of sessions and store in the database</p> <p>When creating or editing a referral a Total Number of sessions can be entered for this referral and the number of sessions used by the patient is also displayed.</p> <p>This feature is enabled via a new practice setting Track count of patient referral settings.</p>
Office	ZED-10443	<p>When displaying the Patient Details in Office, show the Session Count used/total for the Referral displayed</p> <p>When the Track count of Patient Referral Sessions feature is enabled, the Sessions Used/Total Sessions are now displayed for the currently selected referral in Patient Details screen.</p>
Office	ZED-10444	<p>When displaying the appointment details, show the Session Count used/total if a referral is present.</p> <p>When the Track count of Patient Referral Sessions feature is enabled, the Sessions Used/Total Sessions are now displayed in the appointment screen if there is an associated referral.</p>

Clinical	ZED-10445	When displaying the Patient Record in Clinical show the Session Count used/total if a referral is present. When the Track count of Patient Referral Sessions feature is enabled and the site type is set to Specialist, the Sessions Used/Total Sessions are now displayed next to the referral in the Patient Record screen.
Clinical UI		
Clinical	ZED-10183	Hide Summary Views A new set of options has been added to My Options -> Function Selections in Clinical, to customise which tabs appear in the Patient Record Summary Views.
Clinical	ZED-10185	Pin and retract the Patient Demographics In Clinical's Patient Record screen the left part of the screen containing the Patient Demographic Information can now be collapsed, using a new chevron button, to allow the Encounter and Patient History to occupy the whole screen. The left part of the screen can be easily restored by clicking on the chevron button that remains visible.
Clinical	ZED-10189	View History and Consultation panels side by side A new option in My Options enables a side-by-side view of Patient History and the Patient Consultation when a consultation is in progress.
Clinical	ZED-10190	Hide some main toolbar buttons Clinical's My Options now has a set of new Function Selections to customise which buttons appear in the main toolbar.

New fixes v38.7.2

Office	ZED-10683	Users are unable to edit long appointments if double-clicking below the patient name. The appointment details edit dialogue now correctly handles bookings that span multiple time slots. This prevents incorrect warnings about booking start times when editing multi-slot appointments.
Clinical	ZED-10685	Update ChildhoodSchedules xml for the new Prevenar 20 vaccine. Updated 13vPCV to 20vPCV for the childhood immunisation schedule.
Clinical	ZED-10686	Document Preview is not able to close if more than one patient is open in Clinical. Fixed the issue where the close icon was not displayed on the document preview in clinical.
Clinical	ZED-10689	Pregnancy Icon mouse-over text is incorrect. Fixed Pregnancy icon mouse over text.

New fixes v38.7.1

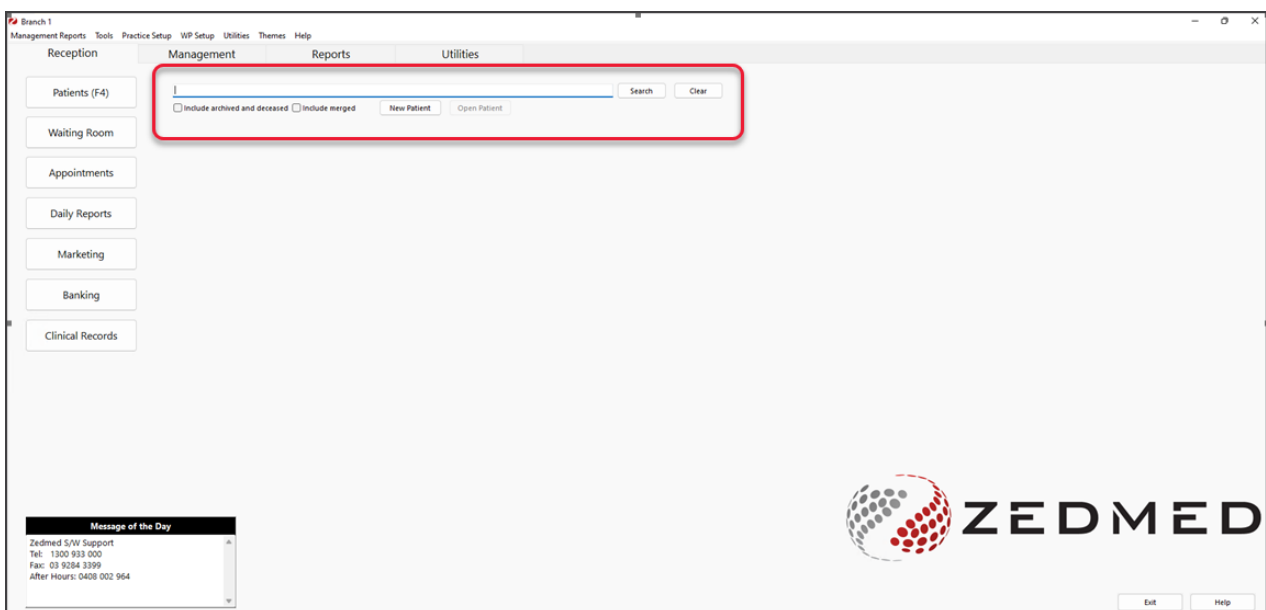

Clinical	ZED-10374	Predictive ICPC Search slowness on first patient after opening clinical Added an indication when loading ICPC data into local cache.
----------	-----------	--

Clinical	ZED-10375	WP Tools Page Setup – Paper Size: DIN A4 (210 x 297 mm) is Missing Fix display of paper sizes in the RTF editor page setup form (Office and Clinical).
Clinical	ZED-10376	Radiology Plain Paper Type N - Print multiple printouts Radiology referral Fixed issue causing duplicate referrals to print when making multiple orders in the same session using the Plain Paper Type N pathology or radiology order forms.
Clinical	ZED-10410	Zedmed Clinical custom dictionary/spellcheck for Zedmed Cloud Fix issue for cloud users that causes Zedmed to forget custom spell check words in Clinical.
Clinical	ZED-10440	Zedmed creating duplicate sessions in Heidi Possible fix for issue where Heidi is generating duplicate sessions for patients.
Clinical	ZED-10459	Zedmed API Service - Out Of Memory Issue Fixed potential cause of memory leak in the download of My Health Record immunisation data.

Zedmed v38.6.2

Zedmed's landing page now has a patient search section

ZED-10548 updates the new search option with a simplified, intuitive design.

Zedmed v38.6.1

Single Sign-On (SSO) support for Duo

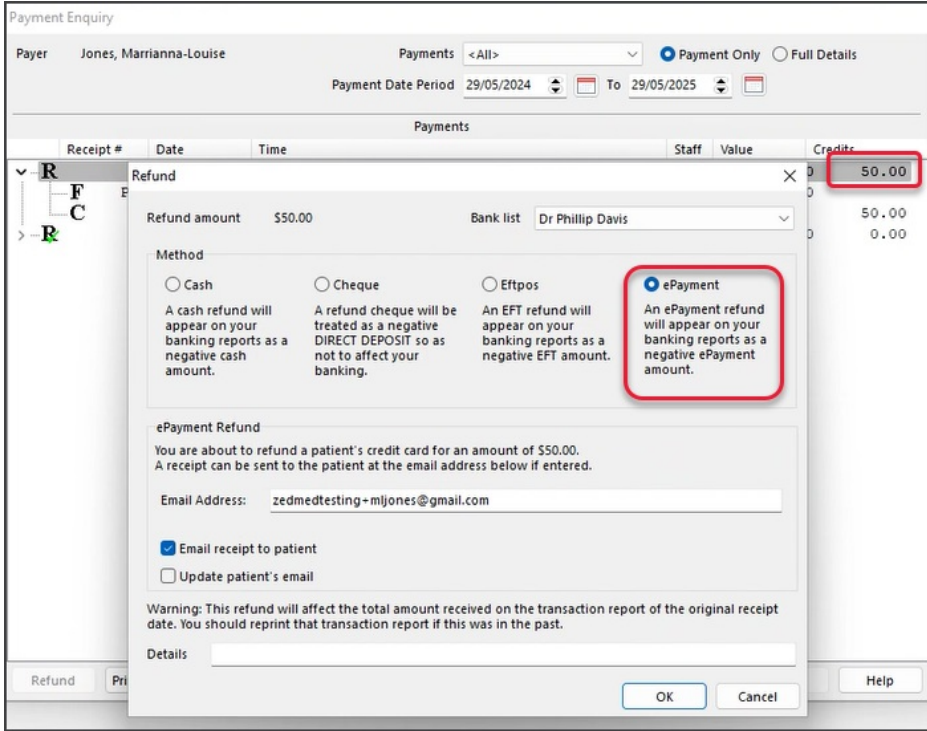

Zedmed Cloud customers can now use **DUO** for (SSO). This means the same credentials can be used to log into Zedmed Cloud and Zedmed PMS using DUO multi-factor authentication.

The F2 Switch User function in Office will no longer work for instances where DUO is the SSO provider as this feature is not supported by DUO. To learn more about SSO, see Zedmed's [user guide](#).

Office	ZED-10552	For v38.6.1: Fixed Error "Request values do not meet requirements. (400)" when processing a Tyro refund. This issue prevented refunds from being processed through Tyro EFTPOS.
--------	-----------	---

Zedmed v38.5.0

New Features

Office	ZED-9954	<p>Refund support for Payment Gateway (ePayments)</p> <p>You can now refund ePayments to patients without using Tyro's eCommerce portal.</p> <ol style="list-style-type: none"> 1. Open the patient's Account Enquiry <p>You will see the current Credits in the top right.</p> <ol style="list-style-type: none"> 2. Select Payments to open Payment Enquiry. 3. Select the Receipt to open the Refund screen. 4. Select ePayment. <p>The screen will expand to show the email address and details.</p> <ol style="list-style-type: none"> 5. Select OK. <p>This will process the refund and send an email notification.</p>  <p>Notes:</p> <ul style="list-style-type: none"> • If a bill includes a surcharge, the surcharge must still be refunded through the Tyro portal. • You can only refund to the credit card billed. A replacement card cannot be refunded to. • Cards are listed in patient details in the order they are used. <p>To learn more, see the new ePayment Refunds guide.</p>
--------	----------	--

Patient search is now embedded in the Reception tab

The patient Search function is now embedded in the Reception tab background and no longer needs to be opened. The search results have also been updated to include the **email address** of each patient.

Select **Clear** in the upper right to start a new search.

Select **New Patient** to add a new patient record.

F4 twice will still open the last patient record that was opened.

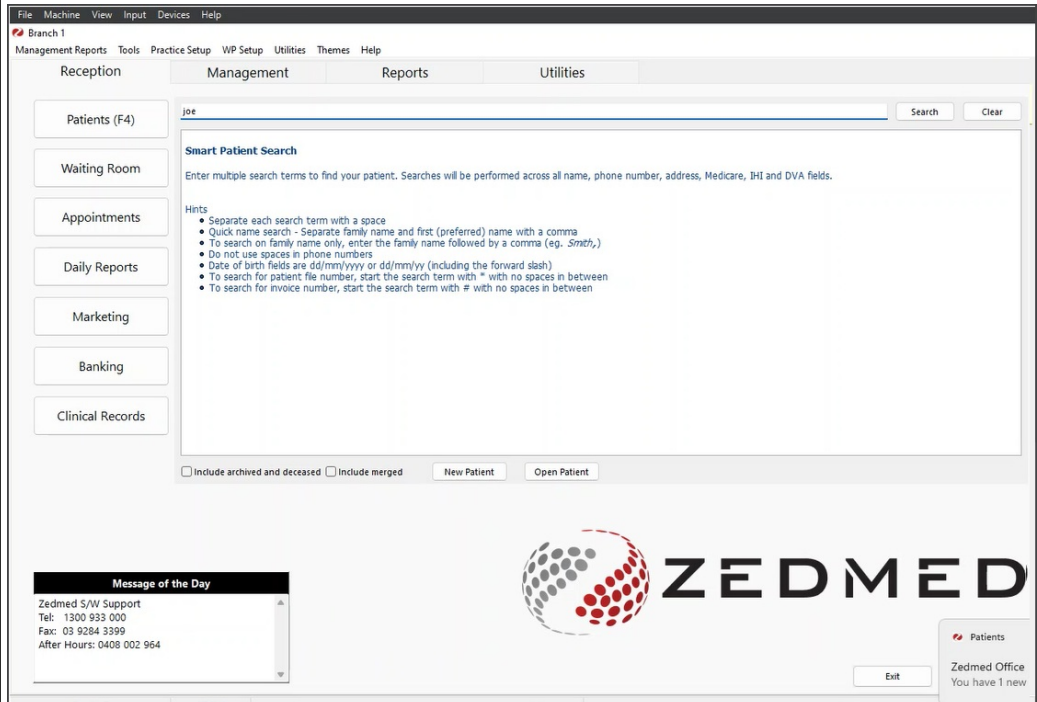

F4 will still bring up a search window.

A classic search can be enabled to open in Branch Options.

The **Notifications** pane will still open on the right to display new messages, e.g incoming Intramail.

Office

ZED-10149

Tyro Terminal Management

Practices with Zedmed v38.5 or later can use the Security module to assign Tyro terminals to users who require them.

The practice will need to add existing Tyro Terminals to the Security module to start using this feature. The practice can do this themselves, and when new terminals are installed, they may be able to do it with Tyro's assistance.

Once the terminals have been added, you can then assign them to the appropriate users. The most common task will be adding new users to the terminals they need.

When a user with more than one Tyro Terminal assigned to them logs into Zedmed, they will be prompted to choose the terminal to use.

To learn more, see the new [Assign Tyro Terminals to Users](#) guide.

The screenshot shows the 'Edit Staff Member' dialog box. The 'User Roles' section has 'Tyro Terminals' selected. Below this, there are two lists: 'Available Terminals' (containing Terminal 4) and 'Included Terminals' (containing Terminal 1, Terminal 2, Terminal 3, and Testing Terminal). Navigation arrows are present between the lists. The dialog also shows fields for User Name (PDAVIS), Staff ID (PD), Dr Code (PD (Phillip Da)), Given Name (Phillip), Family Name (Davis), Title (Dr), and a 'Tyro Terminals' tab.

Updates to features in development

Single Sign On

- Updated to allow SSO to be configured per Zedmed instance.
- HTTPS is now used for internal communication by the Zedmed API and Application Server services.

Telehealth

- Clicking the link to open a Telehealth consultation more than once now displays a warning and only joins the consultation once.
- Updated the icons displayed in Office and Clinical.

Enhancements

The debtor's report now supports grouping by doctor.

When grouping by doctor, you can select to start each on a new page. Group by patient is the default.

Office ZED-10097

Referral doctors can be automatically added to a patient's demographics in Clinical
Specialists will be added to 'Other Clinicians' and GPs to the 'General Practitioner' field.

This is enabled in Practice Setup > Branches > Options > Add Referral Doctor to Clinical's Other Clinicians.

Clinical ZED-10091

Clinical	ZED-10098	<p>Address Book upgrades</p> <ul style="list-style-type: none"> • Now allows searching by 'Provider Number' and 'Organisation Name'. • The width of the search screen has been increased • The ESend Type now displays the ESend Type Name rather than a code. 
Clinical	ZED-10297	<p>A patient's next appointment displays in Clinical Demographics</p> <ul style="list-style-type: none"> • Will show 'None scheduled' if no appointment is booked. • If there are multiple appointments, it will show the closest appointment. 
Clinical	ZED-10298	<p>Smoking icon updates</p> <ul style="list-style-type: none"> • Added "undefined- ?" smoking icon when no information is provided. • Clicking on the icon will open the smoking tab of patient demographics directly. • The icon mouse-over now shows more information. 
Clinical	ZED-10299	<p>Illicit drug icon updates</p> <ul style="list-style-type: none"> • Clicking on the illicit drug usage icon now opens the illicit drug tab of patient demographics directly. • The icon mouse-over now shows more information.

Clinical	ZED-10300	<p>Alcohol icon updates</p> <ul style="list-style-type: none"> Added an alcohol drinking icon, which defaults to “undefined” when no information is provided. Clicking the icon will open the alcohol tab of patient demographics directly. The icon mouse-over now shows more information. 
----------	-----------	---

Fixes

Office	ZED-10088	<p>SMS Icon does not show in the Appointment Book when the Doctor display group is selected</p> <p>Fixed issue where the SMS and Online Appointment icons were not displayed on the appointment grid if a doctor display group is selected.</p>
Office	ZED-10094	<p>Surgical Partners Synchronisation Failed - e-Payment</p> <p>Fixed issue with ePayment transactions not synchronising with Surgical Partners.</p>
Office	ZED-10115	<p>Unable to reconcile claims if there is a null value in the Benefit Paid.</p> <p>The issue that caused the failure to reconcile has been fixed.</p>
Office	ZED-10170	<p>Remove the Report designer button</p> <p>Removed Report Designer from the Tools menu in Office, as this menu item is no longer required.</p>
Office	ZED-10225	<p>Error when Exporting Referrals Expiring Report to CSV. Error: Nullable must have a value</p> <p>Fixed issue where exporting the report containing a patient with a blank DOB would fail and display an error.</p>
Office	ZED-10228	<p>Fixed patient profiles switching to display the correct MyMedicare information.</p> <p>Fixed an issue where switching between different patient profiles (Family Links) displayed the incorrect MyMedicare registration status and information. MyMedicare - Patient details Family Links will now Carry Over Registration Status/Information When Switching Between Patient Profiles</p>
Office	ZED-10275	<p>Do not accept a request for a credit card if the appointment does not have a patient assigned.</p> <p>Removed the ability to attempt to send a payment card request message when there is no patient associated with an appointment.</p>
Clinical	ZED-10112	<p>Healthlink Smartforms - Deleted Problems are incorrectly picked up in the form.</p> <p>Deleted problems are no longer imported into the Healthlink form.</p>

Clinical	ZED-10117	AV when moving the results inbox to a 2nd screen, then closing clinical Closing Clinical while the Results Inbox displays an RTF document will no longer display in an error.
Clinical	ZED-10226	Unable to find Archived Patients in Patient Search for Scan Document Fixed an issue where searching for an archived patient in the Scan module could not find the patient, even when the 'Include archived and deceased patients' option was selected.
Clinical	ZED-10236	Remove Remote Desktop signage Removed background text indicating a Remote Desktop connection from Clinical.
Clinical	ZED-10259	Error when uploading an open file into Zedmed Fixed issue where an error was displayed when trying to upload an open file into Clinical.
Clinical	ZED-10268	Adding a problem from Summary Views does not default to a Selection Method despite settings in My Options. The problem dialogue will now respect the user's preferences for the default search mode when opened from the summary views tab.

Zedmed v38.4.0

Single Sign On

Zedmed introduces Single Sign On support using OKTA.

Updates

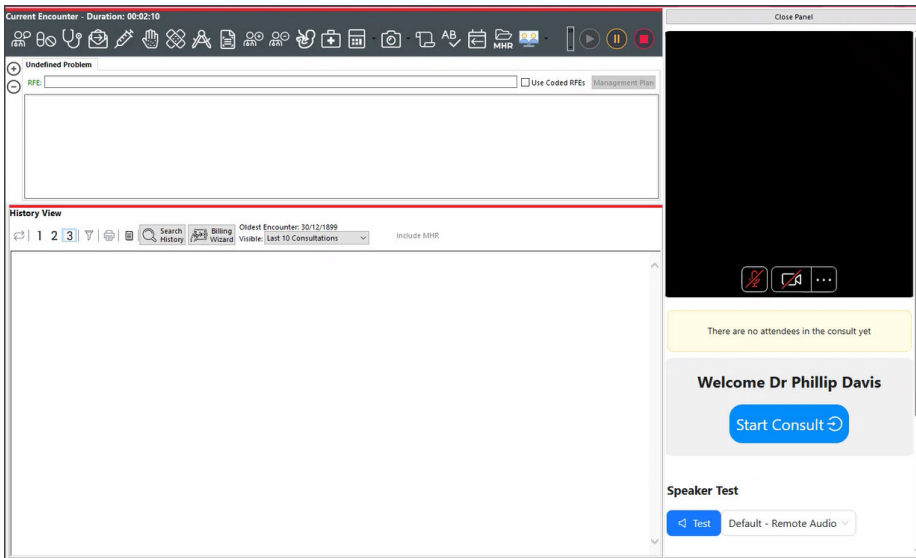

Clinical	ZED-10331	Issue if a Heidi patient has an apostrophe in their name Resolved this issue with an update to the Heidi interface to handle apostrophes in patient names
----------	-----------	---

Zedmed v38.3.1

Telehealth

This new add-on allows practitioners to conduct Telehealth appointments. The practice sends a scheduled SMS with the Telehealth link to the patient, and the practitioner opens the live stream in Zedmed Clinical, a browser or their phone.

To learn more, Zedmed's our [Telehealth user guide](#) and [Telehealth setup guide](#).

Zedmed v38.2.3

Office	ZED-10090	AIR Management Date Range filters do not work Fixed the issue of the Date Range filters not working correctly in the AIR management screen.
Office	ZED-10095	Office - Dollar icon colour to be changed on Status In the Office waiting room and appointments grid, patients who have been billed can now be distinguished from those that have paid in full, or those with voided invoices via different colouration of the billed icon.
Office	ZED-10114	Tyro Terminal selector enhancements The Tyro terminal selector UI for Zedmed Cloud users has been simplified to have a single button for terminal selection.
Office	ZED-10140	Request a credit card from the patient details screen Users can now request payment card details from patients directly within the Patient Details > Payment Cards screen. Also fixed an issue with sending SMS card details request for an appointment with a resource.
Office	ZED-10237	Enhance Tyro adapter to show terminal unique name The Tyro terminal selector can now display a unique "display name" for each terminal. This fixes the issue where there are multiple terminals with the same terminal id.
Clinical	ZED-10037	The "Medications" section from My Health Record is not appearing in the Summary view Fixed the issue of My Health Record medications not displaying in the Medications tab of Summary Views.

Zedmed v38.1.2

Clinical	ZED-10187	Fixed error: Failed to create Edge browser control This error occurred when opening Zedmed Clinical on a Terminal Server, which prevented Heidi from being available if multiple users were running Clinical on the same computer.
----------	-----------	--

Zedmed v38.1.1

Clinical	ZED-10164	AV when selecting Clinical Details in Office and Heidi is not enabled Fixed an AV error that can occur in some instances when the patient history is refreshed.
Office	ZED-10160	Create an installer that installs Web view 2 automatically Each time Office starts up it will check if WebView2 is installed, if not it will run the installer silently. Logging added at Debug level in the Patients.log which shows the check and if the installer was run.

Zedmed v38.1.0

NEW Prevent specific patients from booking in OLA

Practices can now block existing patients from booking appointments using OLA. The feature is enabled using a tick box in the Patient Details and applies to existing patients with OLA accounts that have been reconciled to their patient record.

The screenshot shows the 'Patient Details' form for Chris Armstrong. The form is divided into several sections: Personal, Practice, Family, Payers, Referrals, and Other Contacts. The 'Block patient from online bookings' checkbox is located in the 'Personal' section, below the 'Ethnicity' field, and is checked. The form also displays various fields for patient information, including name, date of birth, address, and contact details.

This is what the patient will see in OLA,

The screenshot shows the 'Confirm My Booking' page in OLA. At the top, there is a red error message: "There was a problem booking your appointment, please contact the centre". Below this, the 'Patient Selection' section lists four options: Matt, Matilda, Chris (selected with a red checkmark), and Lookup Patient. To the right, the 'Appointment Details' section shows the doctor's name, Dr. Phillip Davis, and the appointment type, Std Consultation. A 'Continue' button is located at the bottom of the patient selection list, and a 'Select New Appointment' button is at the bottom of the appointment details section.

Update

Clinical	ZED-10142	Cannot focus on a disabled or invisible windows Fixed an issue where an error was displayed when opening a patient from the clinical waiting room.
----------	-----------	--

Zedmed v38.0.0

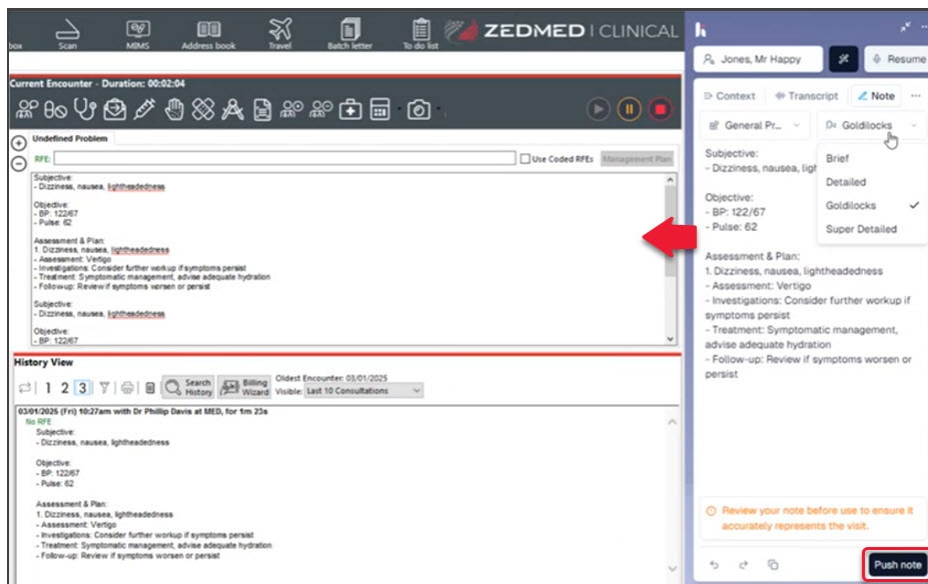

NEW Heidi AI

Originally released as pilot build v37.9.0

Zedmed's Heidi AI integration uses voice input to generate AI-enhanced clinical notes and consultation transcripts. Before it is added to a patient's file, all generated content can be reviewed and manually edited.

To use Heidi AI, each practitioner needs their own paid subscription. To subscribe, select the **Set up Heidi** link in Clinical's Heidi AI widget. You can also use Heidi's 30-day free trial via this link.

To learn more, see the [Heidi AI guide](#).

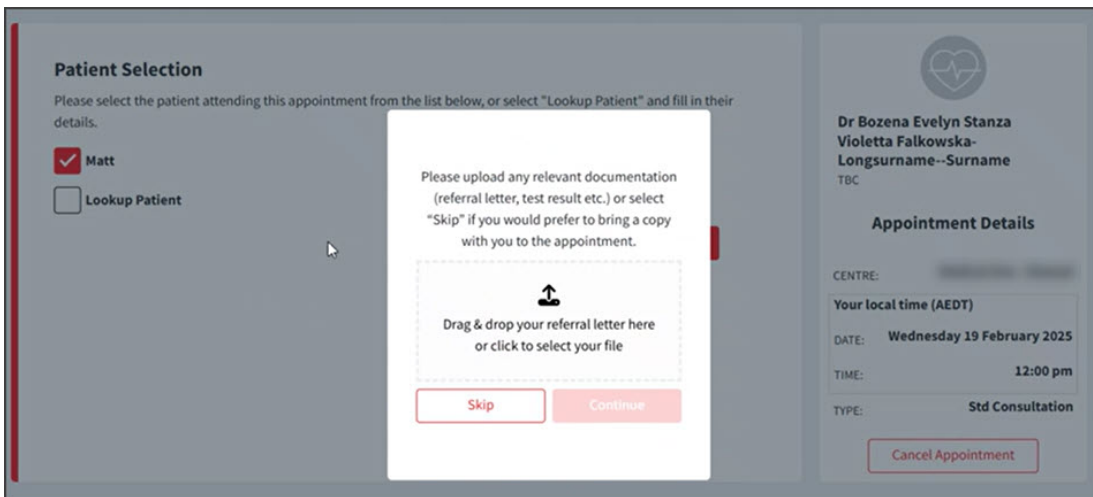

NEW OLA document requests

Practices can now ask patients to upload documents (such as referrals) when making online appointments. The document requirement are enabled for specific Appointment Types, and the documents are delivered to the practice mailbox.

To learn more, see the [OLA document requests guide](#).

Screenshot of a Patient being prompted to provide a referral in OLA.

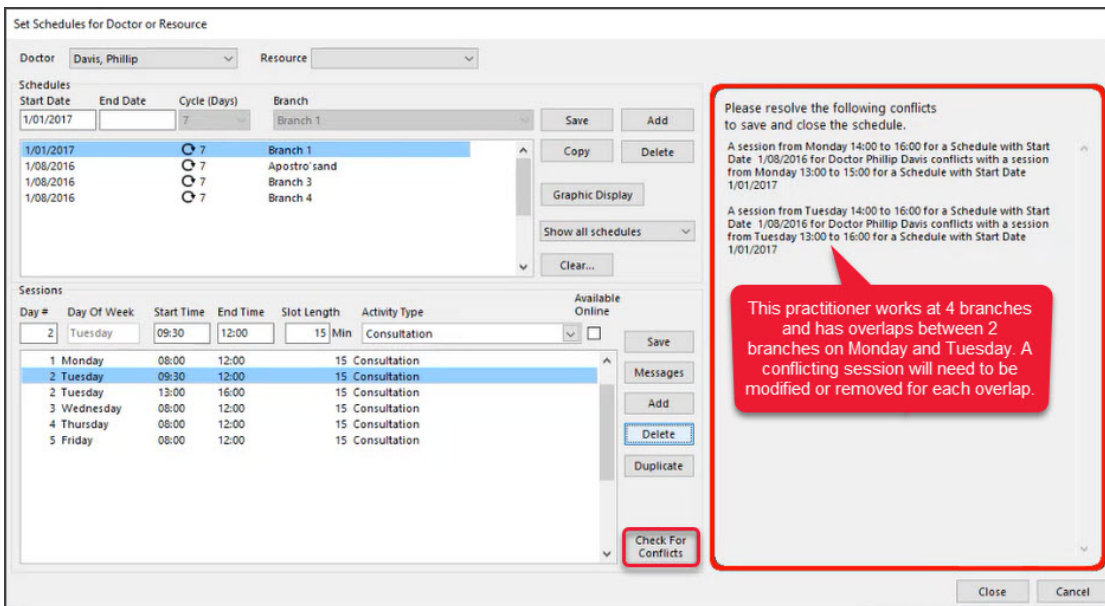

NEW Schedule conflicts preview

When adding or editing a schedule, you can now view conflicts on a dedicated pane, making it easier to review all conflicts and their details in one place. Conflicts often occur when changes are made, and those conflicts will be displayed on the right pane with a red border.

To learn more, see the [Create a Schedule guide](#).

This new feature will allow you to review and modify conflicts

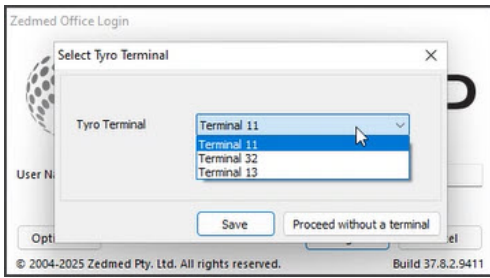

NEW Tyro Terminal selector

Originally released as pilot build v37.8.2

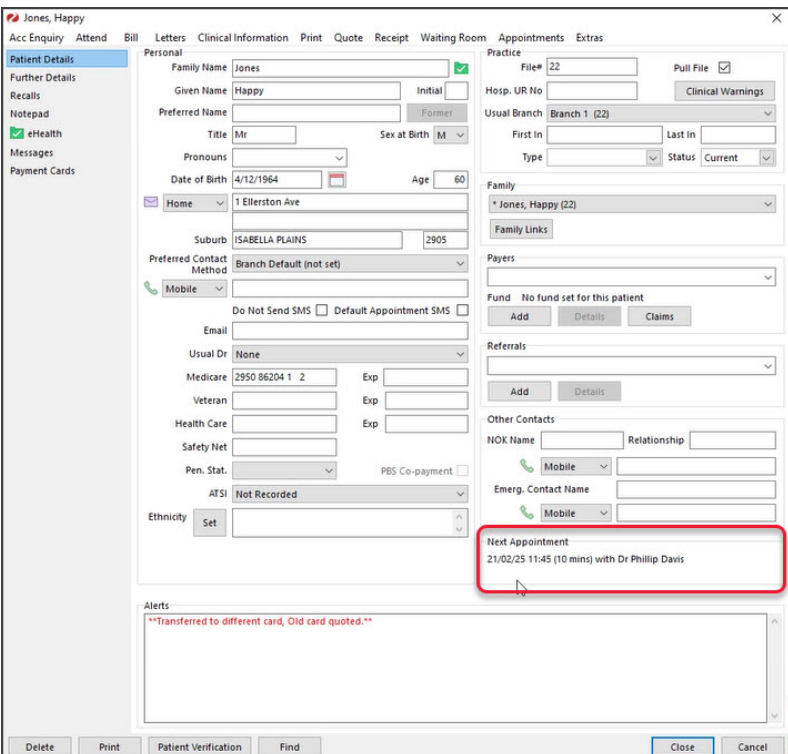

Currently, for Zedmed Cloud, users are linked to Tyro terminals, and each user can only be linked to one. This causes problems if users move desks or need to use a different terminal.

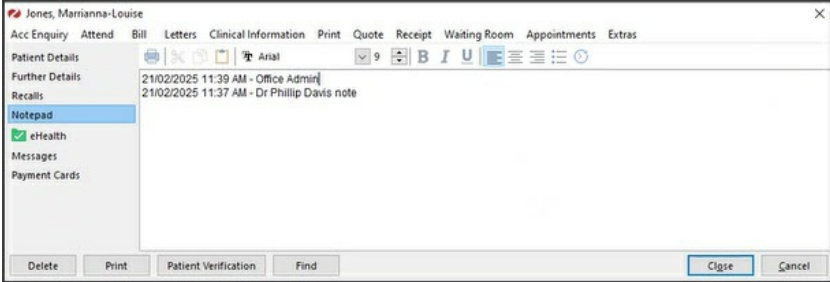

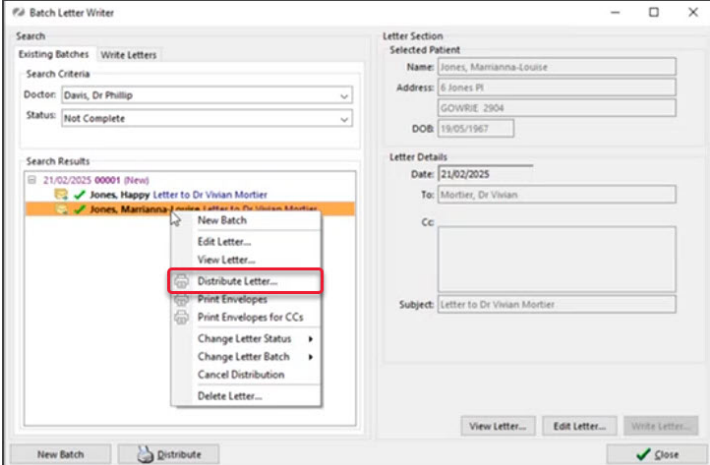

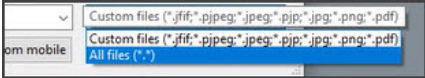

This new feature allows users to select the required terminal when they log in. For on-premise customers, workstations are linked to Tyro terminals (not users) so no change is needed.

To learn more, see the [Tyro Terminal selector guide](#).

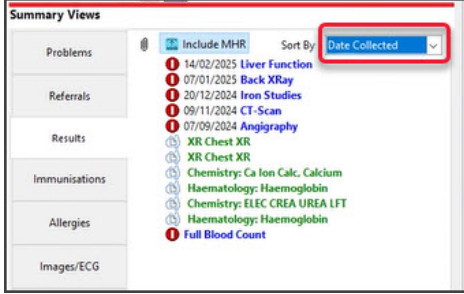

Enhancements

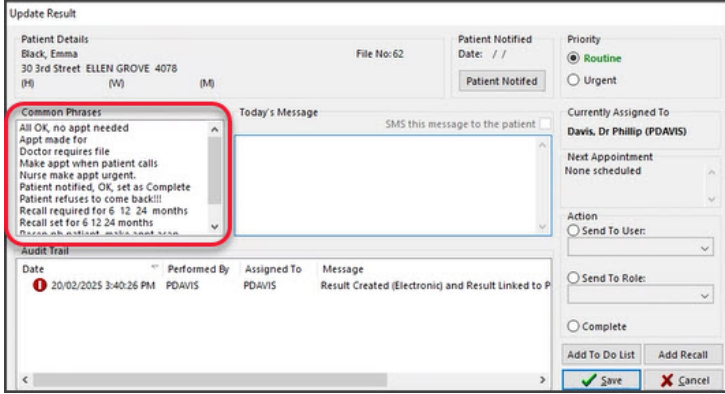

OLA		<p>Practices can set the order of doctors in OLA.</p> <p>The order in which doctors appear in OLA can be modified in Branches > Online Appointment Details. If this feature is used, it overrides the current order, which is determined by the left-to-right doctor order in the Appointment book. To learn more, see the OLA setup guide.</p> 
Office	ZED-9831	<p>A patient's next appointment is now shown on their patient record.</p> <p>Appointments in the past are not shown and will display "No upcoming appointments" if the patient has no future appointments.</p> 

Office	ZED-9846	<p>Unassigned Tasks will no longer show in Task Manager.</p> <p>Task Manager now displays tasks that have not been assigned to staff when selecting the ALL Assignee option. NOT ASSIGNED has been added to the list of Assignees to enable viewing just unassigned tasks.</p>
Office	ZED-10000	<p>In Patient details, the Notepad timestamp now has both the date and time</p> <p>Added time to the timestamp note in patient details, which previously only had the date.</p> 
Clinical	ZED-9633	<p>Secure Send can now be used in Batch Letter Writer for individual letters.</p> <p>Because a batch is sent at once and there is nowhere to add individual emails, Secure Send is provided as a right-click option for each letter.</p> 
Clinical	ZED-9745	<p>Summary Views now supports more file types.</p> <p>Image files can now be attached to the ECG/Images, Incoming Documents and Results tabs. The supported file list is now: jfif, pjpeg, jpeg, pjp, jpg png, pdf.</p> 
Clinical	ZED-9901	<p>Summary Views now support the Docx file type.</p> <p>The docx files can now be attached to Incoming Documents, Documents, Results, and ECG/Images.</p>

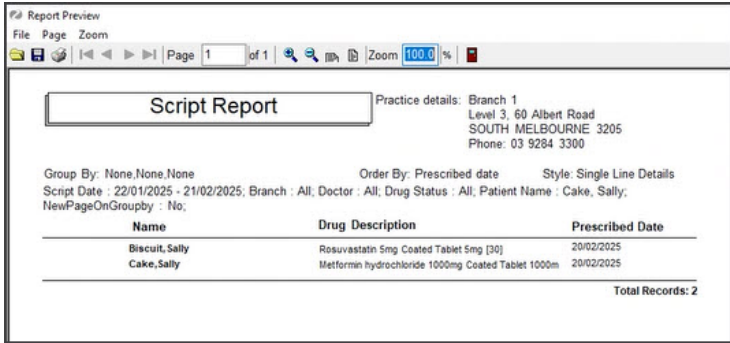

'Results' in Summary Views can be sorted by Date Collected.
 A new option to sort by 'Date Collected' has been added to the Results tab on the Summary Views. When sorting by this option, the appropriate date is displayed for each result listed.

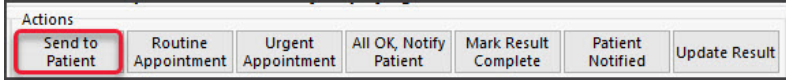

Results Inbox 'Common Phrases' now support more characters.
 The length Common Phrases used to update a result in the Results Inbox in Clinical Records has been extended to 320 characters.

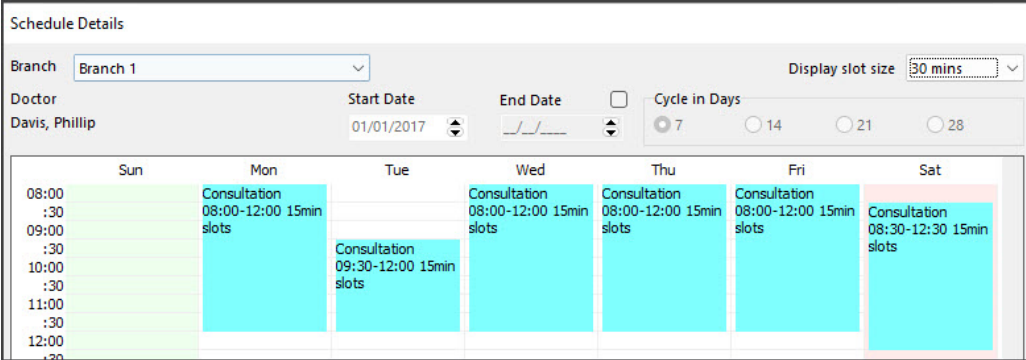

The Script Report now shows all drugs for a patient, even if they changed their name.
 The **Clinical Script Report** now filters patients using their unique patient IDs. This update resolves the issue where patients who have changed their names and received medication under different names were not correctly identified.

Moved the 'Send to Patient button' in the Results Inbox.
 The **Send To Patient** button has been moved to the left of the configurable buttons in the Results Inbox. It was previously to the right of the **Show Result Complete**.

Office		<p>Updated the Schedule Details Graphic display:</p> <ol style="list-style-type: none"> 1. Removed the Doctor and Resource radio buttons. 2. Changed the Doctor/Resource dropdown to be a label that displays the selected schedule 3. The End Date check box defaults to the current date rather than the scheduled start date. 
--------	--	---

Fixes

Office	ZED-6353	<p>Bulk patient Merge issues</p> <p>The following minor usability issues have been fixed on the Patient Merger - Bulk merge</p> <ol style="list-style-type: none"> 1. Do not proceed with merge if the user clicks on the cross icon on the confirmation dialog. 2. Do not show an error message when the user cancels printing.
Office	ZED-9770	<p>3rd party Batch Report - The description overlapped the GST</p> <p>Long item descriptions no longer obscure the GST Amount in the 3rd Party Batch Report.</p>
Office	ZED-9845	<p>Appointment Reminders - Automatic Reminder SMS is not listing resources</p> <p>When sending automatic reminders and confirmations, the Resource name is now displayed if the appointment is with the resource and not a doctor.</p>
Office	ZED-9847	<p>Quote Not Showing GAP Fee</p> <p>Fixed an issue with Billing and Quoting where the Gap was not included on the invoice/quotation even though the print gap option was selected.</p>
Office	ZED-9867	<p>Account Payer Allocation - Unable to view Invoice error " Print Duplicate error"</p> <p>Third Party Account Enquiry/Allocation screen has been fixed to prevent an error when viewing third party invoices.</p>
Office	ZED-9869	<p>Merge Patient files - MyMedicare registration Fields Are Not Saved After Merging</p> <p>When merging patients with My Medicare details, Zedmed now allows the user to select how these are saved in the merged record.</p>

Office	ZED-9891	Appointment grid "Could not convert variant of type (Null) into type (Integer)" error Display a more user friendly message when trying to attend and appointment and the appointment has been deleted by another staff member. Message is "The attendance could not be saved, it has been deleted by another member of staff".
Office	ZED-9834	Assertion failure error for third-party payers Office now blocks attempts to use Secure Send for Third-Party Account Payers, preventing errors that previously occurred when this unsupported feature was incorrectly available.
Office	ZED-9947	Unable to print the Referral Doctor label when using the internal Mail Merge template, getting a Print Referral Doctor Label Error Fixed the issue where an error is reported when there are no referrals relating to the Referral Doctor, using the internal mail merge templates.
Office	ZED-9966	Next Available Search function is not updated after clearing a schedule conflict We have resolved an issue in Zedmed Office where appointment slots were being lost due to scheduling conflicts in doctor schedules.
Office	ZED-10009	Update to Waiting Room auto-refresh frequency branch option Values entered that are 15 or less will now be a refresh in minutes time. Values above 15 will be a refresh time in seconds. The label will automatically change from "(seconds)" to "(minutes)". Label caption at top left of waiting room window will also change.
Office	ZED-10028	Cannot send ZedSMS from new branch - Error - 103: Invalid Config Values When creating a new branch, Zedmed will now correctly save the SMS service provider settings. Previously, users could not send SMS messages from newly created branches.
Office	ZED-10071	Remove the Tip of the Day Editor menu option in Office The Tip of the Day feature is no longer supported and has been removed from Office.
Clinical	ZED-8763	To-Do List freeze when open patient file from result inbox Fixed the issue when clicking Action Performed on a To Do List item for a patient opened from the Results Inbox, Clinical appears to hang.
Clinical	ZED-9629	Results Inbox Access Violation when using arrow keys to navigate from a result that contains an image Fixed an error that can occur when using the keyboard to scroll through results in the results inbox.
Clinical	ZED-9676	AV error when opening the results inbox after importing results Fixed an error that can occur when importing results with a patient record open then opening the results inbox.
Clinical	ZED-9732	Rename option on Pathology/Radiology referrals does not work Removed non-functional rename option from the right click menu of pathology and radiology referrals in the Encounter History view.

Clinical	ZED-9733	AV error when deleting a referral using the contextual menu in History View Disabled non-functional delete option in right click menu for referrals shown in the encounter history. Use the summary view section to manage these documents.
Clinical	ZED-9767	Clinical encounter - Duplicate addendum notes Fix issue that was causing addendums to clinical notes to appear duplicated if a second addendum was added.
Clinical	ZED-9768	Access Violation when viewing/opening images from history view. Clinical no longer throws an error when right clicking on an image in the encounter note.
Clinical	ZED-9769	Referral Templates via Encounter - referral module the global template appears as default instead of the My Option default template. The Clinical Referrals dialog has been fixed to ensure we retain the correct template selections.
Clinical	ZED-9771	Referrals made through HealthLink Smartforms still appear in the list of incomplete referrals even after they have been marked as closed. The Outstanding and Requested referral reports in Clinical have been updated to work with HealthLink referrals.
Clinical	ZED-9804	Update Pregnancy Calculator to current year and beyond. The pregnancy calculator has been updated to allow start dates in the range of 2023 to 2043.
Clinical	ZED-9815	Error -- No Measurement Type exists for measurement SPO2. Fixed error "No Measurement Type exists for measurement SPO2" that occurs when trying to use the SPO2 measurement in clinical observations for some users.
Clinical	ZED-9816	Issue with Distributing Letter from Summary View. Clinical letter writer has been fixed where selecting the distribute button would not show the Distribution screen unless the letter had been modified first.
Clinical	ZED-9868	Range Check Error - Result Inbox. Fixed issue that would cause a range check error to be displayed when viewing some results and selecting the Enhanced View tab.
Clinical	ZED-9892	Billing Wizard - Billing details The "Send Medicare Bulk Billing Consent" button in the billing wizard is covering up text in the payer details. The Medicare Bulk Billing Consent button on the Clinical billing wizard have been repositioned to ensure that the patient's fund details are not cut off.
Clinical	ZED-9912	Clinical Results Inbox filters - on Document or Result does not work after a refresh. The Type filter in Results Inbox was not taking effect on a Refresh. This issue has been resolved.

Clinical	ZED-9931	Printing in progress error. Fixed an issue with printing results, where clicking the print button too many times results in an error.
Clinical	ZED-9968	Referral letter writer screen - Printer in Progress error which leads to an AV. The Clinical letter writer will now handle accidental invocations of the printer when it is already busy printing. Previously, this would trigger an error message.
Clinical	ZED-9977	Access Violation when printing two copies of a referral letter. Clinical Letter Writer has been enhanced to prevent an error when a user closes the window while it is printing two copies of the letter.
Clinical	ZED-9993	Creating a new problem using the same code as an existing or resolved problem incorrectly updates the existing record. It is now possible to create new patient problem(s) for a problem code that has already been created.
OLA	ZED-10044	<i>Released in Zedmed v37.8.3 pilot</i> Resolved performance issues related to the Next Available Appointment query <ul style="list-style-type: none"> • Added a configuration to allow the Next available appointment slot request to cache the next available appointment information. This speeds up the response time. • Added a configuration to modify the number of days OLA will look forward for next available appointments. This configuration is managed by Zedmed support and cannot be done in the Zedmed UI.
